

QUESTIONS AND ANSWERS: The Perinatal Care Core Measure Set

Last year (see December 2012 *Projection*, pages 3–5) The Joint Commission announced the expansion of its ORYX® performance measurement reporting requirements for accredited general medical/surgical hospitals from a minimum of four (4) to six (6) core measure sets effective January 1, 2014. Four of the six sets—acute myocardial infarction (AMI), heart failure (HF), pneumonia (PN), and the Surgical Care Improvement Project (SCIP)—will be mandatory for all general medical/surgical hospitals that serve the specific patient populations addressed by these measure sets (see related article on page 11).

For hospitals with 1,100 births or more per year, the perinatal care (PC) core measure set (shown in the table below) will become the mandatory fifth measure set. The sixth measure set (or fifth and sixth measure sets, for hospitals with fewer than 1,100 births per year) are to be chosen from the remaining complement of core measure sets.

Perinatal Care (PC) Core Measure Set

Mandatory for Hospitals with 1,100 or More Births per Year.
Optional for Hospitals with Fewer than 1,100 Births per Year

| ✓ Applicable Measures | ✓ PC-01: | Elective Delivery |
| | ✓ PC-02: | Cesarean Section |
| | ✓ PC-03: | Antenatal Steroids |
| | ✓ PC-04: | Health Care–Associated Bloodstream Infections in Newborns |
| | ✓ PC-05: | Exclusive Breast Milk Feeding |
| | ✓ PC-05a: | Exclusive Breast Milk Feeding Considering Mother's Choice |

Because there are approximately four million births annually in the United States, The Joint Commission anticipates that the mandatory PC reporting requirement will affect a large number of its accredited hospitals. Many hospitals are evaluating their current perinatal care practices and how they relate to the PC measures. The Joint Commission has received several questions about performance expectations and how the measures will affect the accreditation process. The following answers address organizations' most prevalent inquiries about the PC core measure set.

Which PC measures are accountability measures?

The Joint Commission includes the PC process measures—specifically PC-01: Elective Delivery, PC-03: Antenatal Steroids, and PC-05a: Exclusive Breast Milk Feeding Considering Mother's Choice—in the accountability measures composite calculation.

How does The Joint Commission use information about accountability measures?

The Joint Commission uses the accountability measure composite in a couple of ways. The Joint Commission set an expectation for minimum performance on accountability measures in the following Performance Improvement (PI) standard and element of performance (EP):

Standard PL02.01.03: The hospital improves its performance on ORYX® accountability measures.

EP 1: The hospital achieves a composite performance rate of at least 85% on the ORYX® accountability measures transmitted to The Joint Commission.

The Joint Commission's *Top Performer on Key Quality Measure*® program is another initiative that involves accountability measures. To be recognized as a Top Performer, a hospital must meet three performance-based criteria based on 12 calendar months of data:

1. Achieve a composite rate greater than or equal to 95% across all reported accountability measures.
2. Achieve a performance rate greater than or equal to 95% on each and every applicable reported accountability measure where there are at least 30 denominator cases.
3. Have at least one core measure set for which the composite rate is greater than or equal to 95% and for which the performance rate for all applicable individual accountability measures is also greater than or equal to 95%.

More information on accountability measures is available on The Joint Commission website at http://www.jointcommission.org/accountability_measures.aspx as well as in *Improving America's Hospitals: The Joint Commission's Annual Report on Quality and Safety* (also available on the website).

Because a lower rate is the goal for PC-01: Elective Delivery, how is this measure factored into the PC composite rate?

An increase in the measure rate indicates improvement for many measures; for some measures, however, a decrease in the
