*Albert Taylor Bledsoe* Terry A. Barnhart,2011-06-10 Albert Taylor Bledsoe 1809 1877 a principal architect of the South s Lost Cause mythology remains one of the Civil War generation s most controversial intellectuals In Albert Taylor Bledsoe Defender of the Old South and Architect of the Lost Cause Terry A Barnhart sheds new light on this provocative figure Bledsoe gained a respectable reputation in the 1840s and 1850s as a metaphysician and speculative theologian His two major works An Examination of President Edwards Inquiry into the Freedom of the Will 1845 and A Theodicy Or Vindication of the Divine Glory As Manifested in the Constitution and Government of the Moral World 1853 grapple with perplexing problems connected with causality Christian theology and moral philosophy His fervent defense of slavery and the constitutional right of secession however solidified Bledsoe as one of the chief proponents of the idea of the Old South In An Essay on Liberty and Slavery 1856 he assailed egalitarianism and promoted the institution of slavery as a positive good A decade later he continued to devote himself to fashioning the Lost Cause narrative as the editor and proprietor of the Southern Review from 1867 until his death in 1877 He carried on a literary tradition aimed to reconcile white southerners to what he and they viewed as the indignity of their defeat by sanctifying their lost cause Those who fought for the Confederacy he argued were not traitors but honorable men who sacrificed for noble reasons This biography skillfully weaves Bledsoe s extraordinary life history into a narrative that illustrates the events that shaped his opinions and influenced his writings Barnhart demonstrates how Bledsoe still speaks directly and sometimes eloquently to the core issues that divided the nation in the 1860s and continue to haunt it today      **South African national bibliography** ,1988 Includes publications received in terms of

China World Bank,1993 The Republic of Korea s industrial policy has directed that nation

s economy through nearly three decades of spectacular growth But the authors of this paper maintain that this policy is showing signs of being outmoded The time has come the authors argue for the Korean government to stop managing the economy s structural development and to redefine the responsibilities of business and government Under this proposed compact the allocation of resources would shift from the government to the private industrial and financial sectors The transformation of the government bureaucracy from an ad hoc policy role to one of a transparent and predictable regulator is a key to the success of this undertaking These new directions would present the government with enormous challenges Greater competitive discipline and regulatory oversight would be required While dealing with the complexities of the transition the government would have to maintain macroeconomic stability and the momentum of savings and investment For comparison the study examines the industrial economies of France Germany Japan and the United States which underwent
