International Investment Law Reform Obiajunwa Ama, 2025-03-11 This book offers contemporary assessment of the challenges facing international investment law and proposes innovative solutions for reform The most controversial issue in international investment law is on the settlement of investor state disputes and its implications on national regulatory autonomy This book recognises that current literature in international investment law fails to adequately incorporate diverse perspectives Therefore it interrogates the United Nations Sustainable Development Goals and their relationship with international investment policies of developing countries particularly in Africa where there has been a marked increase in investor state disputes Despite existing reform proposals by the UNCITRAL Working Group III and emerging progressive treaty drafting practices around the world there remains a need for further clarity on how the world should proceed in reforming and restructuring international investment law and policy This book contributes to existing body of research knowledge by presenting new evidence and proposing practical solutions to enhancing the regulation of international investments and promotion of sustainable development It will inform a range of stakeholders including investors civil society organisations States students and international organisations such as the World Bank *Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part A: Global and Sectoral Aspects: Volume 1, Global and Sectoral Aspects* Intergovernmental Panel on Climate Change (IPCC), 2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy *Carbon budgets* Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2011-10-11 This report by the Environmental Audit Committee welcomes the Government's decision to set the fourth carbon budget required under the Climate Change Act at the level recommended by the independent Committee on Climate Change But it questions the Government's decision to announce a review of this budget in 2014 in response to fears that it could be bad for business The MPs warn that the prospect of a review could weaken investor confidence in low carbon industries as it creates uncertainty about the future trajectory of emissions reductions In setting the fourth carbon budget the Government announced that it would bring forward a package of measures to help energy intensive industries most at risk of so called carbon leakage There should be a robust sector by sector assessment of whether jobs and production could be displaced by the UK's carbon budgets The 2014 review could ease the budget if the UK's emissions reduction trajectory is steeper than that required by the EU's Emissions Trading System However the recommended carbon budgets should be regarded as an absolute minimum less ambitious budgets would make the UK's 2050 climate change targets harder and more costly to achieve The MPs strongly support the mandatory emissions reporting by business in order to aid transparency and illustrate the contributions that companies are making The report also criticises
