Kitchen Task Assessment Manual:

Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment. Methods of data collection e.g. observation, interview, standardised testing and sources e.g. self report, proxy for collecting information about clients are then reviewed and the main purposes of assessment e.g. descriptive, evaluative, predictive, discriminative presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

Occupational Therapy for Physical Dysfunction Mary Vining Radomski, Catherine A. Trombly Latham, 2008 The definitive work on occupational therapy for physical dysfunction returns in its Sixth Edition with reputable co editors and clinical, academic and consumer contributors. This text provides a current and well rounded view of the field from theoretical rationale to evaluation, treatment and follow up. Through the Occupational Functioning Model (OFM) the Sixth Edition continues to emphasize the conceptual foundation and scientific basis for practice including evidence to support the selection of appropriate assessments and interventions. NEW TO THIS EDITION: Student DVD with video clips demonstrating range of motion, manual muscle testing, construction of hand splints and transferring patients. Evidence Tables summarize the evidence behind key topics and cover Intervention, Participants, Dosage, Type of Best Evidence, Level of Evidence, Benefit. Statistical Probability and Reference Assessment Tables summarize key assessment tools and cover Instrument and Reference, Description, Time to Administer, Validity, Reliability, Sensitivity and Strengths and Weaknesses.

Handbook of Neuropsychology and Aging Paul David Nussbaum, 2013-11-11 Leaders in neuropsychology, behavioral neurology, speech and language science, neuropsychiatry and many other disciplines contribute to this volume, the first comprehensive review of knowledge in the field. They discuss a wide range of disorders including areas of recent research such as frontal lobe dementias and the neuropsychological aspects of late life depression and clinical problems typically given insufficient consideration in other works such as seizure disorder, head injury and mental retardation. Normal aging is also covered in detail and assessment procedures and clinical interventions are given thorough treatment. Other highlights include discussions of guardianship and caregiving, personality and behavior, psychotic disorders, Alzheimer's and head trauma.
