

ATTACHING 3-POINT HITCH AND DRAWN IMPLEMENTS

Be sure not to damage exposed parts of cab (see arrows) when attaching 3-point hitch mounted or drawn implements.

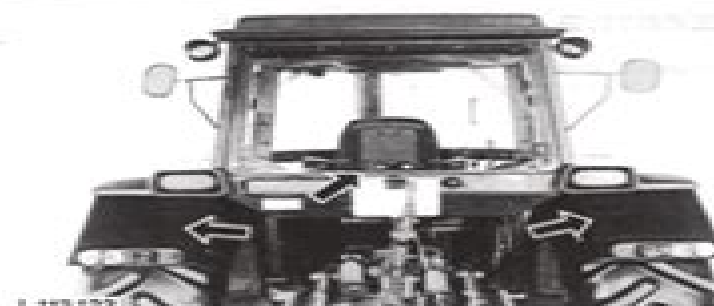

IMPORTANT: When attaching 3-point hitch mounted or drawn implements for the first time, make a trial to be sure the cab will not be damaged in any position of the implement. With hitch-mounted implements pay attention to the highest lift position, with drawn implements be careful when driving sharp turns.

CAUTION: Do not stand between tractor and implement unless handbrake is firmly applied.

If a swinging drawbar is installed, set it in the front, short position. It can also be swung to the left or right and secured.

When attaching an implement, be sure rockshaft selector lever is set in depth control ("MIN") position.

POSITIONING SWAY BLOCKS

The sway blocks (A) are used to limit sideways motion of draft links during operation and transport.

Install sway blocks as shown when attaching implements which are to exactly follow tracks of the tractor.

Remove sway blocks, turn upwards 180° and reinstall if sideways motion is desired for the attached implement (plow, disk harrow) during operation.

With sway blocks in this position, the draft links will sway in operating position. However, sway is locked out in transport position.
