Becoming a Successful Teacher of Mathematics Howard Tanner, Sonia Jones, 2003-09-01 *Becoming a Successful Teacher of Maths* is a practical guide for newly qualified teachers of secondary mathematics. It develops the essential core knowledge, skills and understanding demanded by the new DfEE requirements for courses of initial teacher training. It is based on research findings relating to the organisation and management of maths classrooms, teaching approaches, assessment and the common misconceptions which often hinder pupils' progress in key areas of the National Curriculum. Theoretical principles are exemplified through case study material. Suggestions for school-based activities are made. While being a practical how-to guide for beginning teachers, it also offers critical insights for more experienced teachers reflecting on their practice.

Assessment in Action in the Primary School Colin Conner, 2003-09-02 Assessment has become one of the key issues in primary education over the past 10 years. This edited volume of essays brings together perspectives from all the significant participants involved in assessment in the primary school: teachers, headteachers, LEA advisors, inspectors, pupils, academics and researchers. The contributions illustrate effective assessment and examine how it is and can be achieved. It will be of interest to school assessment coordinators, deputies and heads following NPQH courses and lecturers on IE courses.

Getting Started in Your Educational Research Clive Opie, Desma Brown, 2019-04-08 A one-stop shop for anyone undertaking educational research for the first time, this text focuses on the development and application of key skills necessary for successful research. Packed with useful exercises, checklists and case studies, this book will allow the reader to apply their skills across a range of essays, presentations and reports. Using digestible language to explain complex terminology and processes, simply the authors explore working with and presenting data and the software options available to students including NVivo, SPSS and Excel. The text will help students to understand the language of educational research, frame their research questions and design their research, judge the quality of educational research, explore and justify research approaches and procedures, methods, analyse and present their data. *Curriculum Development* Bill Boyle, Marie Charles, 2016-06-20 Curriculum and curriculum issues are at the heart of current debates about schooling, pedagogy and learning. This book will enable practitioners, scholars and academics to understand how to re-design or to suggest changes to curriculum structure, shape and content. Grounded in theory and philosophy, the book also offers practical help in grasping this controversial area. Inside, the authors provide practical planning templates, support and provoke analysis, discussion and experimentation. It includes definitions of key terms and reflective questions, incorporates practical examples and case material based on their work worldwide on curriculum design and evaluation. Roles and Responsibilities in the Primary School Rosemary Webb, Graham Vulliamy, 1996 Based on qualitative research in 50 schools throughout England and Wales, this book portrays teachers' work as it is experienced in the post-ERA context of multiple innovations. It examines the impact of the National Curriculum and assessment on classroom practice and curriculum organization. International Handbook of
