Mathscape Buyer Beware Teacher Edition:

Improving Instruction in Rational Numbers and Proportionality Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01 Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers. In this book, one of a three-volume set, well-known mathematics educators Margaret Smith, Edward A. Silver, and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction. They focus on ways to engage upper elementary, middle school, and high school students in thinking, reasoning, and problem solving to build their mathematics understanding and proficiency. The content focus of Volume One is rational numbers and proportionality. Using materials that were developed under the NSF-funded COMET Cases of Mathematics to Enhance Teaching program, each volume in the set features cases from urban middle school classrooms with ethnically, racially, and linguistically diverse student populations. Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards-based instruction, the teacher's perspective, including their thoughts and actions as they interact with students, and with key aspects of mathematical content, cognitively challenging mathematics activities that are built around samples of authentic classroom practice, and facilitation chapters to help professional developers teach the cases, including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's own practice. As a complete set, this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning.

A Decade of Middle School Mathematics Curriculum Implementation Margaret R. Meyer, Cynthia W. Langrall, 2008-12-01 Associate Editors: Fran Arbaugh, University of Missouri-Columbia; David C. Webb, University of Colorado at Boulder; and Murrell Brewer Hoover, WVSTEM Center, Marshall University. The purpose of this book is to document the work of the Show Me Project, 1997-2007, and to highlight lessons learned about curriculum implementation. Although the Show Me Project was charged with promoting the dissemination and implementation of four distinct comprehensive curriculum programs: Connected Mathematics, Mathematics in Context, MathScape, and MathThematics, most of the lessons learned from this work are not curriculum-specific. Rather, they cut across the four programs and share commonalities with standards-based curriculum reform at any level. We believe that documenting these lessons learned will be one of the legacies of the Show Me Project. We anticipate that the comprehensive nature of this work will attract readers from multiple audiences that include state and district mathematics supervisors, middle grades mathematics teachers, and administrators involved in curriculum reform, as well as mathematics teacher educators. Those about to embark on the review of curriculum materials will appreciate reading about the processes employed by other districts. Readers with interests in a particular curriculum program will be able to trace the curriculum-specific chapters to gain insights into how the design of the curricula relate to professional development, adoption, and implementation issues, and teachers' personal experience using the curriculum materials. Individuals who provide professional

development at the middle grades level will find chapters that they can use for both general and focused discussions Teachers at all stages of implementation will recognize their own experiences in reading and reflecting on the stories of teacher change Mathematics educators will find ideas on how these curricula can be used in the preparation of preservice middle grades teachers MathScape: Seeing and Thinking Mathematically, Grade 7, Buyer Beware, Student Guide McGraw-Hill,1997-02-28 This unique comprehensive curriculum encourages students to learn mathematics by doing mathematics by using and connecting mathematical ideas and by actively increasing their understanding MathScape Seeing and Thinking Mathematically was developed by Education Development Center Inc with funding from the National Science Foundation It is one of four middle school mathematics programs to receive a satisfactory rating from the American Association for the Advancement of Science AAAS **Teaching Mathematics for the 21st Century** Linda Huetinck,Sara N. Munshin,2008 This third edition of Teaching Mathematics for the 21st Century continues to help teachers let the secret out to open up to their students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject mathematics The rationale remains the same to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students Changing demographics knowledge of how people learn and technology all impact the way we educate our young people This edition incorporates lessons and strategies from programs that have proven success in many types of classrooms Many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts Although technology is constantly being upgraded ways to increase student motivation through its application remains a goal For example since applets can enhance a lesson whether the teacher uses a computer projector a smart board or has students work individually on computers we have identified several sources of mathematics applets that can be correlated to various lessons Research citations and summaries have been updated to reflect current information on teaching and learning For future teachers MathScape Creative Publications, Inc,1998 *MathScape* ,1998 This unique comprehensive curriculum encourages students to learn mathematics by doing mathematics by using and connecting mathematical ideas and by actively increasing their understanding MathScape Seeing and Thinking Mathematically was developed by Education Development Center Inc with funding from the National Science Foundation It is one of four middle school mathematics programs to receive a satisfactory rating from the American Association for the Advancement of Science AAAS MathScape: Seeing and Thinking Mathematically, Course 2, Buyer Beware, Student Guide McGraw Hill,2004-03-11 Buyer Beware Student Guide **MathScape** ,1998
