Customary Rights of Farmers in Neoliberal India Sophy K. Joseph, 2020-02-14
The Protection of Plant Varieties and Farmer's Rights Act 2001 promises to balance the intellectual property rights of plant breeders and farmers under one umbrella legislation. However, there remain several grey areas and the rights of farmers in reality are still tenuous. Though the rights framework was foregrounded on an understanding between non-governmental organizations and industry, there is lack of clarity at both conceptual and procedural levels. In this context, Sophy K. Joseph analyses the impact of legal policy reforms during the ongoing Second Green Revolution on farmers' customary rights and livelihood. The author discusses how the extension of private property rights to plant varieties, seeds, and other agrarian resources changed the demographic composition of the rural space with increased migration of cultivators to the cities. The book argues that the transition from state interventionism during the First Green Revolution to state abstention in the Second Green Revolution has dramatically influenced India's conventional agrarian practices and traditions. This work maps the evolutionary process of neoliberal economic and legal policies and its interference with primary concerns such as food security, food sovereignty, and agrarian self-reliance of the country. *Sessional Papers* British Columbia. Parliament, 1940

Papers R.P., 1964 **Parliamentary Debates** India. Parliament. Rajya Sabha, 2015-02 *Economic Analysis of Supply and Demand for Food Up to 2030* Audun Lem, Trond Bjørndal, Alena Lappo, 2014 With the world's population expected to reach 8.2 billion people by 2030 and with 842 million people estimated as having been undernourished in the period 2011-13, food supply will present a growing challenge in the next two decades. With increases in income along with demographic changes related to family size, population ageing, and urbanization, and consumer trends such as concerns for healthy eating and sustainable production, there will be great shifts in demand and major changes in the composition of demand. This will in turn have an impact on food supply which will need to both increase and become more efficient if it is to grow within the constraints presented by the availability of natural resources and existing technology. This publication presents projections of future food supply up to 2030, building on existing analyses but also providing more economic perspectives on the future evolution of food production.
