Matric March 2014 Common Paper Grade 12:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. The Education We Need for a Future We Can't Predict Thomas Hatch, Jordan Corson, Sarah Gerth van den Berg, 2021-01-19 Improve Schools and Transform Education. In order for educational systems to change we must reevaluate deep seated beliefs about learning, teaching, schooling and race that perpetuate inequitable opportunities and outcomes. Hatch, Corson and Gerth van den Berg challenge the narrative when it comes to the grammar of schooling or the conventional structures, practices and beliefs that define educational experiences for so many children to cast a new vision of what school could be. The book addresses current systemic problems and solutions as it highlights global examples of successful school change. Describes strategies that improve educational opportunities and performance. Explores promising approaches in developing new learning opportunities. Outlines conditions for supporting wide scale educational improvement. This provocative book approaches education reform by highlighting what works while also demonstrating what can be accomplished if we redefine conventional schools. We can make the schools we have more efficient, more effective and more equitable all while creating powerful opportunities to support all aspects of students development. You won't find a better book on system change in education than this one. We learn why schools don't change, how they can improve, what it takes to change a system and in the final analysis the possibilities of system change. Above all, *The Education We Need* renders complexity into clarity as the writing is so clear and compelling. A powerful read on a topic of utmost importance.
