Proposed ICD-9 2011 changes: Look for new stenosis, nerve tumor codes

When coding for lumbar spinal stenosis, you could soon be able to document the presence of neurogenic claudication, according to new ICD-9-CM diagnosis codes proposed for implementation on Oct. 1. Among the list of 143 proposed code changes are a new code for lumbar spinal stenosis that includes neurogenic claudication and one revised code without claudication.

Proposed ICD-9 changes were introduced in the proposed Hospital Inpatient prospective payment systems (IPPS) rule, which CMS released April 12. The final list of diagnosis code changes will be released in July and take effect Oct. 1 this year.

The changes, which include 123 new, 13 invalidated and nine revised codes, add new diagnoses covering a wide range of conditions, including nerve tumors and retained fragments of foreign bodies, as well as blood type incompatibility, multiple pregnancies, cognitive deficits and extreme obesity (see *Full list of changes* included on this month's *Physician TipSheet*).

For the stenosis codes, the proposed changes include:

- revised code **T24.82** (spinal stenosis, other than cervical, lumbar region, without neurogenic claudication [includes not otherwise specified]); and
- new code **T24.83** (spinal stenosis, other than cervical, lumbar region, with neurogenic claudication).

The change was requested by Andelle Teng, MD, a spine and orthopedic surgeon in Auburn, Wash., who told the ICD-9-CM Coordination and Maintenance Committee – which maintains the code set – that a patient may have lumbar stenosis either with or without neurogenic claudication. Lumbar stenosis is simply defined as a narrowing of the lumbar spinal canal, which does not imply a symptomatic or surgical condition (i.e., neurogenic claudication). Teng states,

However, if stenosis at a single level becomes severe enough, or if the nerves are being compressed by multiple levels of stenosis, a patient may become symptomatic and experience neurogenic claudication, which is a possible surgical condition, according to
