**Itineraries of Expertise** Andra B. Chastain, Timothy W. Lorek, 2020-03-10 Itineraries of Expertise contends that experts and expertise played fundamental roles in the Latin American Cold War While traditional Cold War histories of the region have examined diplomatic intelligence and military operations and more recent studies have probed the cultural dimensions of the conflict the experts who constitute the focus of this volume escaped these categories Although they often portrayed themselves as removed from politics their work contributed to the key geopolitical agendas of the day The paths traveled by the experts in this volume not only traversed Latin America and connected Latin America to the Global North they also stretch traditional chronologies of the Latin American Cold War to show how local experts in the early twentieth century laid the foundation for post World War II development projects and how Cold War knowledge of science technology and the environment continues to impact our world today These essays unite environmental history and the history of science and technology to argue for the importance of expertise in the Latin American Cold War

**Labour and Economic Change in Southern Africa c.1900-2000** Rory Pillosof, Andrew Cohen, 2021-06-03 This book explores the social and economic development of Zimbabwe Zambia and Malawi over the course of the twentieth century These three countries have long shared and interconnected pasts All three were drawn into the British Empire at a similar time and the formation of the ill fated Federation of Rhodesia and Nyasaland formally linked these countries together for a decade in the mid twentieth century This formal political relationship created dynamics that resulted in yet closer economic and social links After Federation the economic realities of industry transport and labour supplies meant that these three countries continued to be intricately interconnected Yet despite these connected pasts comparative work on the economic histories of Malawi Zambia and Zimbabwe and how these change over time is rare This book addresses the gap by providing the first comprehensive collection of labour and census data across the twentieth century for these three countries The different economic models and performances of these states offer good comparison allowing researchers to look at different models of development and how these played out over the long term The book provides data on population growth and change industrial and occupational structure and the various shifts in what the economically active population did It will be useful for historians economists development studies scholars and non governmental organisations working on twentieth century and contemporary southern Africa

**Applications of Computational Intelligence in Data-Driven Trading** Cris Doloc, 2019-11-05 Life on earth is filled with many mysteries but perhaps the most challenging of these is the nature of Intelligence Prof Terrence J Sejnowski Computational Neurobiologist The main objective of this book is to create awareness about both the promises and the formidable challenges that the era of Data Driven Decision Making and Machine Learning

are confronted with and especially about how these new developments may influence the future of the financial industry The subject of Financial Machine Learning has attracted a lot of interest recently specifically because it represents one of the most challenging problem spaces for the applicability of Machine Learning The author has used a novel approach to introduce the reader to this topic The first half of the book is a readable and coherent introduction to two modern topics that are not generally considered together the data driven paradigm and Computational Intelligence The second half of the book illustrates a set of Case Studies that are contemporarily relevant to quantitative trading practitioners who are dealing with problems such as trade execution optimization price dynamics forecast portfolio management market making derivatives valuation risk and compliance The main purpose of this book is pedagogical in nature and it is specifically aimed at defining an adequate level of engineering and scientific clarity when it comes to the usage of the term Artificial Intelligence especially as it relates to the financial industry The message conveyed by this book is one of confidence in the possibilities offered by this new era of Data Intensive Computation This message is not grounded on the current hype surrounding the latest technologies but on a deep analysis of their effectiveness and also on the author s two decades of professional experience as a technologist quant and academic
