

# HESI MENTAL HEALTH STUDY GUIDE

## PTSD - rape and stabbing

Studies have shown that victims of PTSD are at increased risk of suicide. The highest priority is to determine if the client has any intentions or thoughts of self harm.

## Crisis Intervention

Those in crisis need to be guided in solving problems, so instructing the person in crisis what needs to be done is the best response for the nurse to make.

In crisis intervention, the nurse should facilitate the client in finding possible solutions.

## OCD - preop client

The behaviours exhibited by a client with obsessive-compulsive personality disorder are maladaptive responses to anxiety, and may worsen during periods of high anxiety.

encouraging the client to express concerns may help to reduce their anxiety, therefore reducing some of their maladaptive behaviour
