Czech (& Central European) Yearbook of Arbitration - Borders of Procedural and Substantive Law in Arbitral Proceedings - 2013 Alexander J. Bělohávek, Filip Cerný, Naděžda Rozehnalova, 2013-03-01 The Czech Yearbooks Project for the moment made up of the Czech Yearbook of International Law and the Czech Central European Yearbook of Arbitration began with the idea to create an open platform for presenting the development of both legal theory and legal practice in Central and Eastern Europe and the approximation thereof to readers worldwide This platform should serve as an open forum for interested scholars writers and prospective students as well as practitioners for the exchange of different approaches to problems being analyzed by authors from different jurisdictions and therefore providing interesting insight into issues being dealt with differently in many different countries The Czech Central European Yearbook of Arbitration the younger twin project within the Czech Yearbooks primarily focuses on the problematic of arbitration from both the national and international perspective The use of arbitration as a method of dispute resolution continues to increase in importance Throughout Central and Eastern Europe arbitration is viewed as being progressive due to its practical aspects and to its meeting the needs of specialists in certain practice areas Central and Eastern Europe the primary but not exclusive focus of this project is steeped in the Roman tradition of continental Europe in which arbitration is based on the autonomy of the parties and on informal procedures This classical approach is somewhat different from the principles on which the system of arbitration in common law countries is based Despite similarities among countries in the region arbitration in Central and Eastern Europe represents a highly particularized and fragmented system One shortcoming in the use of arbitration in Central and Eastern Europe is the absence of comparative standards or a baseline that would facilitate the identification of commonalities and differences in individual countries and help resolve problems that are common throughout the region The CYArb project aims to address this issue and provide a forum for comparisons of arbitration practice and doctrine in countries within the region and in relation to practices internationally It sheds light on both practical and academic aspects within these countries and compares those approaches to broader European and international practices This project will also foster a broad exchange of legal research and other information on the subject The third volume of the CYArb focuses on the blurry area which borders the procedural and substantial law Editors being motivated with an endeavour to provide the readers with complex insight into the problematic invited authors of Civil same as Common law jurisdictions to provide their insight and analysis on the problems of i e mandatory provisions of procedural same as substantive law issues of application of law in arbitration adjudication according to the ex aequo et bono principles issues of the burden and standard of proof and others The issues are presented on highly comparative basis provided mostly by practitioners who are simultaneously involved in academic activities The book is divided into four sections The backbone sections encompass the doctrinal articles of the authors same as case law analysis of the domestic courts from the region relating to the topic covering the case law of Constitutional

General same as Arbitral courts of the countries from the Central European Region The rest of the book covers the news in the arbitration area same as interesting arbitration events or published articles and books of the authors from the region The new volume of the The Czech Central European Yearbook of Arbitration Borders of Procedural and Substantive Law in Arbitral Proceedings Civil versus Common Law Perspectives brings useful resource for everyone who is dealing with arbitration in all of its aspects be it an academic practitioner law or international relations student who seeks global compendium on the issue including an overlap to economic and politic aspects of the problematic

The most important and recent judgments of the CJEU Considering the ever increasing importance of indirect taxation as a source of revenue for governments the intensifying complexity of the legal framework and the proliferating number of countries adopting indirect taxation it is essential to scrutinize how the law is applied in practice The primary driving force in this area is undoubtedly the Court of Justice of the European Union This book analyses selected topics e g fighting VAT fraud obligations imposed on digital platforms taxable person taxable transactions place of supply taxable base and rates exemptions and deductions by examining the most prominent and recent judgments of the Court of Justice of the European Union Experts from all over the world not just from academia but also government and judiciary representatives as well as tax practitioners have provided their input and helped us compile what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis *Budget 2011* Great Britain: Parliament: House of Commons: Treasury Committee,2011-04-09 The report looks at the way the Office for Budget Responsibility has functioned in this the first Budget since it was permanently established It raises concerns about the timetable for the economic forecast noting the timetable agreed for this forecast and Budget required all decisions which would impact on the economic forecast to be made at least a fortnight before Budget day It recommended that the timetable should be revisited to provide more flexibility enabling economic shocks and late political decisions to be accommodated The Committee looked at the economy public finances the plan for growth taxation and the Office for Budget Responsibility It continues to press for a full review of the OBR including its powers remit and relationship to Parliament Also calling for gradual reform of the tax regime and noting the Government s decision to increase the supplementary rate of corporation tax on the oil and gas industry by 12 percentage points in the Budget less than a year after promising to provide a stable tax regime in the sector might weaken the Government s credibility in seeking to establish a stable tax regime The Committee was pleased with the further reduction in corporation tax announced in the Budget as this was a positive measure aimed at boosting growth With regard to Enterprise Zones it may have some effect in reviving particular areas but it was noted that almost all the evidence received is unsure about the extent to which they will contribute to UK growth It is clear that there is still much to be done on the details of this policy
