Liberalisation and Economic Development in Africa Gift Mugano,2021-09-30 This book provides a thorough and rigorous
discussion on the impact of trade liberalisation on economic development with a special focus on the African continent The
author presents the rationale for trade liberalisation trade liberalisation frameworks the trade liberalisation economic
development nexus impediments to trade and contemporary issues of international trade In this book notwithstanding the
benefits from trade liberalisation the author shows that African trade as a share of global trade has remained flat at 3% as in
1975 while the continent s exports have remained raw materials and its intra regional trade at less than 15% of total trade
which is the lowest in the world UNCTAD 2020 With respect to key economic development indicators such as economic
growth poverty levels and employment levels this book shows that ironically and in direct contrast with the conventional
views that trade liberalisation alleviates poverty trade liberalisation in Africa has resulted in high levels of unemployment and
low economic growth which ultimately lead to increased poverty In addition this book provides a detailed analysis of why
trade liberalisation has failed to yield meaningful benefits to Africa The binding constraints and blockages which prevent
positive spin offs on trade liberalisation in Africa are discussed in detail in this book In the same vein the author provides
practical strategies which must be adopted by African countries in order to gain from trade liberalisation making this work a
must read for African governments academia trade experts regional trading blocs the World Trade Organization and
development partners In view of this and as part of the disruptive and structural transformation policies the author discusses
case studies and international experience contextualised to Africa as well as strategies for addressing the trade related

Maringe,2021-04-09 Maringe ought to be commended for putting together an invaluable contribution to our understanding of
research into a complex education system in South Africa This volume provides a useful foundation to the current state of
education quality in South Africa including the impact of interventions It also brings to the fore challenges still facing
education transformation The evidence presented which taken together lays out a coherent view of how improvements could
be made Albert Chanee Head of Planning Gauteng Department of Education For too long the weight of educational
scholarship produced in South Africa has been limited to that simple and standard form called the literature review Now for
the first time education researchers are provided with an African based text on the concepts and methods of conducting
systematic reviews In this exceptional work of editorship Felix Maringe brings together some of the leading researchers on

South African education to model and demonstrate how to review a significant body of research on a chosen topic which is adjudicated strictly on the basis of the quality and efficacy of the evidence in hand I have no doubt that this remarkable book will become a standard reference for educational researchers in and beyond the African continent It will also lift the quality of educational inquiry by equipping a new generation of scholars with the capacity for doing evidence based research that compels the attention of policymakers planners and practitioners alike Prof Jonathan Jansen Stellenbosch University
