Dobrin,2004-02-26 Problematizes traditional ethnographic research methods offering instead self reflexive critical practices

Ethnographic Ways of Knowing Lucinda Carspecken,2024-06-14 Drawing on the works of ten scholars and public intellectuals ranging over 200 years this book foregrounds ways of knowing that include but go beyond the cognitive The book explores the work of Harriet Martineau Jane Addams W E B Du Bois Zora Neale Hurston Ella Deloria M N Srinivas Barbara Myerhoff Orlando Fals Borda Ronald Takaki and Nawal El Saadawi The author discusses their multifaceted ethnographic practices and argues that such practices are still under acknowledged in contemporary research in comparison to cognition and categorization These scholars were outsiders to their societies in a variety of ways They highlighted power imbalances in the perception and representation of one group by another and brought direct experience emotion narrative

imagination recognition self reflection activism and cultural humility into their writing in addition to rationality The book engages with the authors and their ideas in the context of their times and places It also reclaims them as methodological predecessors noting their contributions to what educational ethnography has been and what it could be in the future Expanding the canon of social research history and providing insight into unique methodological forms this text will be valuable for scholars and postgraduate students with interests in ethnography as well as the history of research anthropology and qualitative methods more broadly

Critical Ethnography and Education Katie Fitzpatrick, Stephen May, 2022-04-28 In this book Fitzpatrick and May make the case for a reimagined approach to critical ethnography in education Working with an expansive understanding of critical they argue that many researchers already do the kind of critical ethnography suggested in this book whether they call their studies critical or not Drawing on a wide range of educational studies the authors demonstrate that a methodology that is lived embodied and personal and fundamentally connected to notions of power is essential to exploring and understanding the many social and political issues facing education today By grounding studies in work that reimagines troubles and questions notions of power injustice inequity and marginalization such studies engage with the tenets of critical ethnography Offering a wide ranging and insightful commentary on the influences of critical ethnography over time Fitzpatrick and May interrogate the ongoing theoretical developments including poststructuralism postcolonialism and posthumanism With extensive examples excerpts and personal discussions the book thus repositions critical ethnography as an expansive eclectic and inclusive methodology that has a great deal to offer educational inquiries Overviewing theoretical and methodological arguments the book provides insight into issues of ethics and positionality as well as an in depth focus on how ethnographic research illuminates such topics as racism language gender and sexuality in educational settings It is essential reading for students scholars and researchers in qualitative inquiry ethnography educational anthropology educational research methods sociology of education and philosophy of education

Knowing how to Know Narmala Halstead, Eric Hirsch, Judith Okely, 2008 Through the idea of the extended field this volume examines current issues in fieldwork and ethnography and provides new insights into the problems of ethnographic knowledge construction It is a text for new fieldworkers established researchers and those looking for material to support modules on these issues Nine anthropologists reflect on their experiential processes of knowing by considering how different aspects of fieldwork and the writing up process informed their accounts Drawing on both theory and empirical material this volume actively engages with the dilemmas faced by fieldworkers and relates them to current debates and the notion of crisis in academe whilst illustrating the complexities of knowing how to know by probing material from different historical periods and various regions

BOOK JACKET New Perspectives in Political Ethnography Lauren Joseph, Matthew Mahler, Javier Auyero, 2007-09-20 The use of ethnographic research social research based on the observation of individuals or institutions where the researcher becomes part of the group or very close to the group to better understand their actions is becoming

more and more of a prevalent methodology within sociology As ethnography gains prominence within the discipline its focus theoretical underpinnings and narrative styles are also expanding to the yet unexamined worlds and institutions of society Politics political institutions and those working in politics state officials politicians and activists have so far missed the lens of the ethnographer As a group politicians and those in politics can be found in every corner of the world While political systems and politicians are by no means the same in every country what brings these people together to be part of the political process Ethnography is uniquely equipped to look microscopically at the foundations of political institutions and their attendant set of practices just as it is ideally suited to explain why political actors behave the way they do and to identify the causes processes and outcomes that are part and parcel of political life The volume based on a special issue of Qualitative Sociology has a two fold purpose to bring politics into the ethnographic literature and of ethnography in studies of politics The case studies included are based on the research of ethnographers studying the various level of politics in Brazil Japan El Salvador Bosnia the Philippines India and the United States It will be of interest to those in the sociology of politics political science and those looking for ethnographic research on a global level *Ethnographies of Science*

Education Carol Brandt, Heidi B Carlone, 2015-09-25 Researchers who conduct ethnography in science education tend to have a deep commitment for transforming science to improve the lives of people in underserved communities This edited volume explores how contemporary ethnographers in science education bring to light the local production of scientific knowledge and the ways it is implicated in larger social and political struggles Ethnographies in science education contribute to understanding the experiences of linguistically racially and economically diverse populations who have been historically excluded from participation in science An anthropological approach has also been instrumental in explicating the situated practices by which students enact science in the classroom and in their lives beyond schools This edited volume brings together ethnographers in science education to contribute a global perspective on science teaching and learning in school and university classrooms at home and after school programs Included are examples of ethnography in science education from the UK Argentina Canada and the USA in which contributors point to promising directions for theorizing the culture of science education as we undertake educational reform The authors in this volume argue that ethnography is not only a valid approach for the study of science education but also they contend that it is essential to the development of more equitable practices for instruction and learning This book was originally published as a special issue of *Ethnography and Education*

Ethnography for Education Christopher Pole, Marlene Morrison, 2003-12-16 Ethnography is a distinctive approach for educational research The authors argue that the last decade has seen ethnography come of age not only as a way of doing research but also as a way of theorizing and making sense of the world Their approach is concerned with ethnography as process and ethnography as product This critical celebration of ethnography explores what it can achieve in educational research The book features Thorough discussion of definitions of ethnography and its potential for use within educational

research Critical introductions to the principal approaches to ethnography Discussions of data analysis and representation and of the challenges facing ethnography Use of educational examples from real research projects throughout The book offers a distinctive contribution to the literature of ethnography taking readers beyond a simplistic how to approach towards an understanding of the wider contribution ethnography can make to our understanding of educational processes Ethnography for Education is of value to final year undergraduates and postgraduates in education and social science disciplines as well as education professionals engaged in practice based research Christopher Pole is Senior Lecturer at the Department of Sociology University of Leicester His research interests are in the areas of the sociology of education sociology of childhood and the development of qualitative research methods Recent publications include Practical Social Investigation Qualitative and Quantitative Methods in Social Research and Hidden Hands International Perspectives on Children's Work and Labour Marlene Morrison is Reader in Education Leadership and Director of the Doctorate of Education programme at the University of Lincoln Her academic background is in the sociology of education and includes research on race equality health education perspectives on educational policy and practice and the ethnography of educational settings She has researched widely in the education that has included school further and higher education sectors and other public services

Ethnography and Schools Yali Zou, Enrique T. Trueba, 2002-06-25 The ethnographic experience is an indelible venture that continuously redefines one's life Bringing together important cross currents in the national debate on education this book introduces the student or practitioner to the challenges resources and skills informing ethnographic research today From the first chapter describing the cultural foundations of ethnographic research by George Spindler the book traces both traditional and new approaches to the study of schools and their communities Emphasis on discourse critical pedagogy and ethnicity are among the many aspects of methodology and educational change emphasized by the contributors

Innovations in Educational Ethnography George Spindler, Lorie Hammond, 2012-10-12 This volume focuses on and exemplifies how ethnography a research tool devoted to looking at human interaction as a cultural process rather than individual psychology can shed light on educational processes framed by the complex internationalized societies in which we live today Part I offers theoretical chapters about ethnography and examples of innovative ethnography from particular perspectives In Part II the emphasis is on the application of ethnographic approaches to educational settings Each contribution not only takes the reader on a thoughtful and enlightening journey but raises issues that are important to both educators and ethnographers including the relationship of researcher to subject the meaning of participant in participant observation and ways to give voice to disenfranchised players and on the complex ways in which all parties experience identities such as race in the modern world Innovations in Educational Ethnography Theory Methods and Results is a product of both continuity and change It presents current writings from mentors in the field of ethnography and education as well of the work of their students and of educators engaged in cultural studies of their work In many ways it provides fresh new

vistas on the old questions that have always guided ethnographic research and can be used as a survey both of what ethnography has been and what it is becoming This book is the work of many hands and provides excellent examples of trends in both basic and applied ethnography of education These two kinds of work augment and reinforce each other and also represent important current research directions in depth reflection on the process of ethnography itself and an application of its insights to teaching and learning in schools universities and communities No one philosophy guides the contributions to this volume nor were they chosen as exemplary of a particular approach yet foundational understandings and principles of ethnography shine through the work in both predictable and unexpected ways
