Advances in Intelligent Computing De-Shuang Huang, Xiao-Ping Zhang, Guang-Bin Huang, 2005-09-16 The International Conference on Intelligent Computing ICIC was set up as an annual forum dedicated to emerging and challenging topics in the various aspects of advances in computational intelligence fields such as artificial intelligence machine learning bioinformatics and computational biology etc The goal of this conference was to bring together researchers from academia and industry as well as practitioners to share ideas problems and solutions related to the multifaceted aspects of intelligent computing This book constitutes the proceedings of the International Conference on Intelligent Computing ICIC 2005 held in Hefei Anhui China during August 23-26 2005 ICIC 2005 received over 2000 submissions from authors in 39 countries and regions Based on rigorous peer reviews the Program Committee selected 563 high quality papers for presentation at ICIC 2005 of these 215 papers were published in this book organized into 9 categories and the other 348 papers were published in five international journals The organizers of ICIC 2005 made great efforts to ensure the success of this conference We here thank the members of the ICIC 2005 Advisory Committee for their guidance and advice the members of the Program Committee and the referees for reviewing the papers and the members of the Publication Committee for checking and compiling the papers We would also like to thank the publisher Springer for their support in publishing the proceedings in the Lecture Notes in Computer Science series Particularly we would like to thank all the authors for contributing their papers

ChemE Balancer: Guide to Balancing Chemical Equations Rajan Keshri, Book Description ChemE Balancer Guide to Balancing Chemical Equations is the ultimate resource for science students seeking to conquer the challenges of balancing chemical equations Whether you are a high school student just beginning your chemistry journey or a college student in need of a refresher this comprehensive guide is designed to make the process accessible and easy to understand With its user friendly interface and step by step instructions ChemE Balancer equips you with the knowledge and skills to confidently tackle even the most complex chemical equations Say goodbye to confusion and frustration as you unravel the mysteries of balancing equations with a single click Inside this book you will find

- 1 Clear Explanations Understand the fundamental principles behind balancing chemical equations through concise and accessible explanations Learn the significance of coefficients and subscripts and how they influence the equation's balance
- 2 Step by Step Instructions Follow along with detailed step by step instructions that guide you through the process of balancing equations Gain a solid foundation and build your skills as you progress through various examples
- 3 Practice Exercises Reinforce your understanding and sharpen your balancing skills with a wide range of practice exercises From simple to challenging these exercises provide ample opportunity to apply your knowledge and gain confidence
- 4 Tips and Tricks Discover helpful tips and tricks to overcome common challenges and pitfalls in balancing chemical equations Master strategies to simplify complex equations and handle different types of reactions Whether you are preparing for exams

completing assignments or simply seeking a deeper understanding of chemical reactions ChemE Balancer is your go to guide Empower yourself with the tools and knowledge to excel in chemistry and unleash your true potential Don't let balancing chemical equations intimidate you any longer With ChemE Balancer you will embark on a journey of mastery and confidently navigate the world of chemistry Get ready to click your way to chemical balancing success *Handbook of Near-Infrared Analysis* Emil W. Ciurczak, Benoît Igne, Jerome Workman, Jr., Donald A. Burns, 2021-05-19 Rapid inexpensive and easy to deploy near infrared NIR spectroscopy can be used to analyze samples of virtually any composition origin and condition The Handbook of Near Infrared Analysis Fourth Edition explores the factors necessary to perform accurate and time and cost effective analyses across a growing spectrum of disciplines This updated and expanded edition incorporates the latest advances in instrumentation computerization chemometrics applied to NIR spectroscopy and method development in NIR spectroscopy and underscores current trends in sample preparation calibration transfer process control data analysis instrument performance testing and commercial NIR instrumentation This work offers readers an unparalleled combination of theoretical foundations cutting edge applications and practical experience Additional features include the following Explains how to perform accurate as well as time and cost effective analyses Reviews software enabled chemometric methods and other trends in data analysis Highlights novel applications in pharmaceuticals polymers plastics petrochemicals textiles foods and beverages baked products agricultural products biomedicine nutraceuticals and counterfeit detection Underscores current trends in sample preparation calibration transfer process control data analysis and multiple aspects of commercial NIR instrumentation Offering the most complete single source guide of its kind the Handbook of Near Infrared Analysis Fourth Edition continues to offer practicing chemists and spectroscopists an unparalleled combination of theoretical foundations cutting edge applications and detailed practical experience provided firsthand by more than 50 experts in the field *Quantitative Methods in Tourism* Rodolfo Baggio, Jane Klobas, 2017-07-06 In this revised second edition Baggio and Klobas build upon the work of their previous volume offering a presentation of quantitative research methods for tourism researchers This accessible and rigorous guide goes beyond the approaches usually covered in introductory textbooks on quantitative methods to consider useful techniques for statistical inquiry into tourism matters of all but the most econometrically complex kind The first part of the book concerns common issues in statistical analysis of data and the most widely used techniques while the second part describes and discusses several newer and less common approaches to data analysis that are valuable for tourism researchers and analysts Updates to the second edition include a new chapter on Big Data consideration of data screening and cleaning the use of similarity and diversity indexes for comparing samples observations about the partial least squares PLS approach to path modelling a new section on multi group structural equation modelling a new section on common method variance and its treatment revised and updated section on software fully updated references and examples **Optimal Trajectory Planning and Train Scheduling for Urban Rail Transit**

Systems Yihui Wang,Bin Ning,Ton van den Boom,Bart De Schutter,2016-04-21 This book contributes to making urban rail transport fast punctual and energy efficient significant factors in the importance of public transportation systems to economic environmental and social requirements at both municipal and national levels It proposes new methods for shortening passenger travel times and for reducing energy consumption addressing two major topics 1 train trajectory planning the authors derive a nonlinear model for the operation of trains and present several approaches for calculating optimal and energy efficient trajectories within a given schedule and 2 train scheduling the authors develop a train scheduling model for urban rail systems and optimization approaches with which to balance total passenger travel time with energy efficiency and other costs to the operator Mixed integer linear programming and pseudospectral methods are among the new methods proposed for single and multi train systems for the solution of the nonlinear trajectory planning problem which involves constraints such as varying speed restrictions and maximum traction braking force Signaling systems and their effects are also accounted for in the trajectory planning model Origin destination passenger demand is included in the model formulation for train scheduling Iterative convex programming and efficient bi level approaches are utilized in the solution of the train scheduling problem In addition the splitting rates and route choices of passengers are also optimized from the system point of view The problems and solutions described in Optimal Trajectory Planning and Train Scheduling for Urban Rail Transit Systems will interest researchers studying public transport systems and logistics whether from an academic or practitioner background as well as providing a real application for anybody studying optimization theory and predictive control

Handbook of Image and Video Processing Alan C. Bovik,2010-07-21 55% new material in the latest edition of this must have for students and practitioners of image video processing This Handbook is intended to serve as the basic reference point on image and video processing in the field in the research laboratory and in the classroom Each chapter has been written by carefully selected distinguished experts specializing in that topic and carefully reviewed by the Editor Al Bovik ensuring that the greatest depth of understanding be communicated to the reader Coverage includes introductory intermediate and advanced topics and as such this book serves equally well as classroom textbook as reference resource Provides practicing engineers and students with a highly accessible resource for learning and using image video processing theory and algorithms Includes a new chapter on image processing education which should prove invaluable for those developing or modifying their curricula Covers the various image and video processing standards that exist and are emerging driving today s explosive industry Offers an understanding of what images are how they are modeled and gives an introduction to how they are perceived Introduces the necessary practical background to allow engineering students to acquire and process their own digital image or video data Culminates with a diverse set of applications chapters covered in sufficient depth to serve as extensible models to the reader s own potential applications About the Editor Al Bovik is the Cullen Trust for Higher Education Endowed Professor at The University of Texas at Austin where he is the Director of the

Laboratory for Image and Video Engineering LIVE He has published over 400 technical articles in the general area of image and video processing and holds two U S patents Dr Bovik was Distinguished Lecturer of the IEEE Signal Processing Society 2000 received the IEEE Signal Processing Society Meritorious Service Award 1998 the IEEE Third Millennium Medal 2000 and twice was a two time Honorable Mention winner of the international Pattern Recognition Society Award He is a Fellow of the IEEE was Editor in Chief of the IEEE Transactions on Image Processing 1996 2002 has served on and continues to serve on many other professional boards and panels and was the Founding General Chairman of the IEEE International Conference on Image Processing which was held in Austin Texas in 1994 No other resource for image and video processing contains the same breadth of up to date coverage Each chapter written by one or several of the top experts working in that area Includes all essential mathematics techniques and algorithms for every type of image and video processing used by electrical engineers computer scientists internet developers bioengineers and scientists in various image intensive disciplines

Optimization in Engineering Ramteen Sioshansi, Antonio J. Conejo, 2017-06-24 This textbook covers the fundamentals of optimization including linear mixed integer linear nonlinear and dynamic optimization techniques with a clear engineering focus It carefully describes classical optimization models and algorithms using an engineering problem solving perspective and emphasizes modeling issues using many real world examples related to a variety of application areas Providing an appropriate blend of practical applications and optimization theory makes the text useful to both practitioners and students and gives the reader a good sense of the power of optimization and the potential difficulties in applying optimization to modeling real world systems The book is intended for undergraduate and graduate level teaching in industrial engineering and other engineering specialties It is also of use to industry practitioners due to the inclusion of real world applications opening the door to advanced courses on both modeling and algorithm development within the industrial engineering and operations research fields
