Race in Education Gerhard Mare,2019-05-31 There is global evidence that the ghostly notions of essentialist differences between human groups continue to haunt in various forms. People draw upon ideas of religion, race, ethnicity, gender and sexuality and nation to draw distinctions. Racism, xenophobia, sexism and right wing populism are ongoing and increasing phenomena. In addition, genetic science has introduced new forms of evidence which lends itself to misuse to confirm the common sense perceptions. The valuable contributions of the authors in this publication not only warn against such notions but offer ways of exploring, exposing and challenging the ghosts and the fears engendered through their contemporary forms.

This book brings together diverse recent developments exploring social, cultural, political dimensions in mathematics education. It builds theoretical ideas from a careful, substantial description of practice in the attempt to improve both theory and practice in mathematics education. In doing so, it interrogates and develops theoretical research tools for mathematics education and simultaneously provides ideas for practice in mathematics classrooms.
