Memorandum Of Life Science September 2014

Baba Prasad

Memorandum Of Life Science September 2014:

William Watson Cheyne and the Advancement of Bacteriology Charles DePaolo, 2016-09-29 William Watson Cheyne 1852 1932 a surgeon by training and a student of Joseph Lister was a prominent British bacteriologist who published 60 papers and 13 monographs from 1879 to 1927 A proponent of the idea that bacteriology and medicine were interdependent disciplines he investigated the causes and treatment of wound infections tuberculosis cholera tetanus and gangrene In 1897 he organized an historical outline of 19th century bacteriology in five landmark periods of discovery each defined by the work of an influential figure This study documents his contributions to the history of microbiology and describes his activities as a laboratory investigator clinician surgeon translator editor and educator Where Has Social Justice Gone? Emmanuelle Barozet, Ivan Sainsaulieu, Régis Cortesero, David Mélo, 2022-07-01 This book uses survey data in hot spots around the globe to analyse various models of social justice particularly the principle of equality from a pragmatic perspective Starting with ordinary actors social movements and concrete contexts the authors question foundations of social and political democracy in our times They focus on how social actors deal with the principles of justice and judgments of justice at work and in their social lives The book suggests that the increase in social inequalities in recent decades contrasts with the blurring of the aims of social justice At a time when the reconsideration of politics largely depends on its relevance to and aspirations for social justice the authors of this book question contemporary developments by illustrating its variety according to specific historical institutional social and organizational contexts The book will be useful to students and scholars in the social sciences especially those interested in moral questions regarding social justice from an empirical and practical point of view

Nimble Baba Prasad, 2015-04-24 The world today can be best described by one word turbulence As change rages all around how can you as an individual or as an organization take advantage of unexpected opportunities and succeed in difficult circumstances In a book that challenges traditional notions of strategy Baba Prasad draws on his research at some of the world's best business schools to show how intelligence can help you and your business navigate this maelstrom The Intelligences Framework presented in Nimble goes beyond the common management concept of agility it presents an immensely practical and hands on approach for companies and individuals to develop five kinds of intelligences and apply them in different settings for maximum benefit Bridging strategy leadership and innovation and with vivid illustrations Nimble provides a path breaking assessment methodology and a systematic four step approach that every company and individual can use to lead amid turbulence

Molony, Tomaso Fortibuoni, Simone Libralato, Pierre Failler, 2022-03-15 **The Truth Pill** Dinesh Singh Thakur, Prashant Reddy Thikkavarapu, 2022-10-10 Since 2004 when the fraud at Ranbaxy the largest Indian pharmaceutical

company at the time first came to light the Indian pharmaceutical industry and clinical research organizations have been rocked by a series of scandals after investigations by American and European drug regulators While the West has responded to concerns about quality of Made in India medicine by blocking exports from many Indian pharmaceutical companies the Indian government responded not with regulatory reform but conspiracy theories about vested interests working against India More worryingly the Indian state has also turned a blind eye to a far more serious quality crisis in its domestic pharmaceutical market At times these quality issues manifest themselves in the deaths of Indian citizens as happened in early 2020 when 11 children died in Jammu because of adulterated cough syrup On other occasions a dodgy drug approval process has led to the Indian regulator approving sales of drugs that have never been approved by regulators in the developed markets The result is not just poor health outcomes but outsize profits for pharmaceutical companies manufacturing medicines that have never been validated through scientifically rigorous clinical trials for therapeutic evidence These twin crises in both the domestic and export markets is because India has either outdated regulations or no regulations in some areas Even the outdated regulations are enforced with kids gloves by drug inspectors and judicial magistrates who are ready to forgive even those whose drugs are found to contain barely any active ingredient or dangerously high levels of bacterial endotoxins In a race for growth of the pharmaceutical industry the Indian state has sacrificed scientific rigour and ignored the basic principles of public health Given India s position as the pharmacy of the developing world the failure of the Indian state is a problem for not just India but most of the developing world This timely important and compelling book based on deep research questions and analyzes the actions of the institutions that are responsible for the safety and efficacy of the Indian drug supply in the context of the historical evolution of the Drugs Act 1940 from pre Independence India to the present day The future of Indian public health lies in responding to the issues raised in this book
