Sexuality Education that Prioritizes Sexual Well-Being: Initiatives and Impact Jacqueline Hendriks, Allison Carter , Jessie Ford, 2025-12-01 All children and young people should receive comprehensive sexuality education from a variety of sources that empowers them to develop a positive self identity and provides them with the tools necessary to form healthy relationships and to manage their own sexuality and sexual health The positive impact such education has for the health and well being of individuals communities and societies has been extensively documented in academic literature Despite the strong evidence base the actual provision of sexuality education can vary markedly across settings and countries and may often focus on biology the prevention of violence diseases or pregnancy and the use of fear based or sex negative messaging Contemporary international guidelines and extensive empirical research strongly encourage strengths based models that are sex positive and empower young people to develop healthy relationships and to learn about pleasure and sexual well being Such programs are often ground in human rights and ethical frameworks In reality specific examples of such programs and guidance about implementation are not easily accessible Research and evaluation data may also be limited or not widely shared The intention of this Research Topic is to showcase a variety of evidence based initiatives that prioritize and celebrate sexual well being through education The impact of such programs shall also be explored alongside broader discussions about implementation sustainability replication and scaling We are keen to spotlight initiatives that address a specific sexuality education topic alongside more extensive programs A variety of age groups preK 16 and educational settings e g home school community online are welcome Critically a key attribute of any showcased initiative is that it seeks to provide education via sex positive approaches that address sexual well being sex positivity and or pleasure This Research Topic welcomes research that includes but is not limited to the following scientifically rigorous evaluations of educational interventions empirical examinations of best practice in educational design meta analyses of educational practice innovation or pedagogies barriers and enablers to program implementation sustainability replication and or scale up cross cultural and or cross national studies study protocols Potential topics of interest include but are not limited to Inclusion of young people in educational design How pleasure discourse is contextualized within sexuality education curricula Human rights Implementation challenges Ethical issues Adolescents views on sex and pleasure education The role of digital technology We especially welcome submissions from young people people from key populations and community based organizations We request that submissions adhere to the principles of respectful and stigma free language

Child Injury and the Determinants of Health Amy Peden, Richard Franklin, 2021-03-23 The World Health Organization recognizes that injuries are the leading cause of death and disability to children after their first birthday There is also high morbidity associated with injuries sustained in childhood often affecting people for the rest of their lives For every child who dies from injury there are several thousand who require medical care

many who live with varying degrees of disability Children and adolescents 0 19 years of age are at increased risk of mortality and morbidity due to injuries such as road traffic burns falls poisoning drowning self harm and interpersonal violence There are proven ways to prevent many child injuries yet there are still gaps in our knowledge By understanding the impact of determinants of health i e the social and economic environment the physical environment and a person s individual characteristics and behaviors effective prevention interventions can be designed and implemented with a high return on investment This Special Issue covers an eclectic range of studies the common goal of which is to reduce the global burden of child injury related mortality and morbidity
