Life Orientation Caps Document:

The Strategic Repositioning of Arts, Culture and Heritage in the 21st Century George Mugovhani, Owen Seda, 2018-06-11
The post millennium world has been experiencing several recognisable historical milestones with regard to arts culture and heritage One of these has been the resuscitation and revival of creative elements of the arts culture and heritage of previously marginalised or disadvantaged communities around the world Until recently there had been scant regard and skewed allocation of resources for these but lately attempts have been made to promote and sustain them in order to enable the socio economic aspirations of a multicultural society The contributions brought together here are the product of papers that were presented during a conference on Strategic Repositioning of Arts Culture and Heritage in the 21st Century They cover a broad spectrum of subjects such as indigeneity music song and identity politics national reconciliation education product development and national development

Citizenship, Education and Violence Waghid Yusef, 2013-12-30 The focus of this book is to offer a humane rocesponse to dealing with violence An interpretive analysis is presented in order to think differently about violence in schools and about how a citizenship education of becoming can deal with the unpredictable consequences of violence in its own potentiality It seems to the authors that given the confident onslaught of violence there is nothing left to do but to offer insight into the nature of violence itself and by so doing to search for unexplored ways of humane response and being The authors are not pretending to hold a magic wand that will sanctify schools into the safe zones that they ought to be and as which they should serve in any society This would be both presumptuous and misleading What one is looking and hoping for however is a renewed engagement a slight tilting of the perspective so that something other than how we have always responded to violence perhaps will emerge The authors are confident that such a deconstructive approach to violence in schools through the lens of a reconsidered view of citizenship education can assist them and others to wrestle with its potential for destruction that can be changed into options for co belonging of a non violent if not peaceful kind

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a

substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
