Chemical Signals in Vertebrates 13 Bruce A. Schulte, Thomas E. Goodwin, Michael H. Ferkin, 2015-12-09 In 2014 the Chemical Signals in Vertebrates CSiV group

held its 13th triennial meeting in conjunction with the 30th meeting of the International Society of Chemical Ecology ISCE. The meeting convened on the campus of the University of Illinois at Urbana Champaign. This meeting was the first held jointly with these two groups which share common history and are dedicated to understanding the role of chemical communication in the lives of organisms. This volume is a collection of the proceedings of this meeting and like the meeting cover a variety of topics in chemical ecology including Chemical Ecology of Social Behavior, Chemical Signals Analysis and Synthesis, Evolution, Genomics and Transcriptomics of Chemical Signals, Molecular Mechanisms of Semiochemical Perception and Processing, Multimodal Communication and Neuroethology and Neurophysiology. Working with indigenous knowledge Fhumulani M. Mulaudzi, Rachel T. Lebesse, 2022. The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes, practices and experiences. The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship, thus making it accessible to a wider audience. In addition, the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals. This book is timely and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space. The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu. Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities. The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally. This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning, teaching, evidence-based practice and further research.
