Ideas and Cultural Margins in Early Modern Germany Marjorie Elizabeth Plummer, 2016-12-14 While the assumption of a sharp distinction between learned culture and lay society has been broadly challenged over the past three decades the question of how ideas moved and were received and transformed by diverse individuals and groups stands as a continuing challenge to social and intellectual historians especially with the emergence and integration of the methodologies of cultural history This collection of essays influenced by the scholarship of H C Erik Midelfort explores the new methodologies of cultural transmission in the context of early modern Germany Bringing together articles by European and North American scholars this volume presents studies ranging from analyses of individual worldviews and actions influenced by classical and contemporary intellectual history to examinations of how ideas of the Reformation and Scientific Revolution found their way into the everyday lives of Germans of all classes Other essays examine the ways in which individual thinkers appropriated classical medieval and contemporary ideas of service in new contexts discuss the means by which groups delineated social intellectual and religious boundaries explore efforts to control the circulation of information

and investigate the ways in which shifting or conflicting ideas and perceptions were played out in the daily lives of persons families and communities By examining the ways in which people expected ideas to influence others and the unexpected ways the ideas really spread the volume as a whole adds significant features to our conceptual map of life in early modern Europe

Domingo de Soto and the Early Galileo William A. Wallace,2018-01-18 The unifying theme in this second volume of essays by William A Wallace to be published in the Variorum series is signaled in the title of the opening paper Domingo de Soto and the Iberian roots of Galileo s science The seven essays in the first part provide textual studies of Soto s early formulations of the laws of falling bodies the context in which they were developed in the 16th century and the ways in which they were transmitted in Spain and Portugal to the early 17th century mainly by Jesuit scholars The following essays focus on the young Galileo and his work at Pisa and Padua leading to his discovery of the law of uniform acceleration in free fall Textual evidence is presented for an indirect influence of Soto s work on Galileo mediated by Jesuits who were teaching at Padua in the first decade of the 17th century **The Encyclopaedic Dictionary** Robert Hunter,1903
