Microsoft Project 2010 is an extensive software update with many new functions and as a result this is a complete rewrite of the author's previous book. It is primarily a Microsoft Project book and has been written for people learning to use Microsoft Project in a project environment applying the PMBOK Guide Fifth Edition processes. It aims to teach readers how to plan and control projects created within the software package and stays focused on explaining how to use Microsoft Project to schedule projects by explaining which PMBOK Guide processes the software will support and which it will not support. Concentrating on the core functions required to plan a project, it presents workable solutions to real day to day planning and scheduling problems and contains practical advice on how to set up the software. Explains some of the important difference between Microsoft Project and other scheduling software. Explains some of the more difficult calculations often omitted in other books. Includes exercises to reinforce the learning outcomes, a large number of screen dumps, numerous tips, a detailed index and command list at the start of each chapter as a quick reference. It has a chapter dedicated to the new functions available in Microsoft Project 2010.

About the Author: Paul Harris holds an Honours Degree in Civil Engineering obtained in the UK and is a Certified Cost Engineer through AACEI International, a PRINCE2 Registered Practitioner, an Approved PRINCE2 Trainer and a Managing Successful Programmes Registered Practitioner.
