Beading looms all have the same basic design, with weaving achieved by inserting the weft threads side to side, threads over and under the stationary warp threads, up and down threads. The warp threads are held in place by tension, and the weft threads, which hold your beads, are woven between the warp threads. The length and width of your finished piece will be determined by the length and number of your warp threads. Learning how to use a beading loom can catapult your craft repertoire.
