For this assignment you are to perform and write up a brief naturalistic observation. Follow the guidelines below:

You are to spend approximately five to ten minutes watching and making a detailed record of a naive subject, gathering data which will "begin" to test your hypothesis. Plan your observational "method" to be sure you are not "discovered" (so that the "naturalistic" quality of the observation is not lost). Take notes on everything you can observe about the subject (environment and surroundings, physical appearance and dress, and all behaviors, especially those relevant to your hypothesis). After you have finished,
