Severe Pulmonary Emphysema: Luis Carlos Losso, Pallav L. Shah, Gerald J. Criner, Walter Weder, José R Jardim, 2024-10-24 Chronic obstructive pulmonary disease is of 2024 one of the three main causes of death in the world affecting around 12% of the world's population Its incidence is estimated to increase in the coming decades due to continuous exposure to risk factors and to an aging population Pulmonary emphysema is one of its most serious phenotypes with chronic and inexorable progression and in the most severe stages it is highly disabling and lethal This book reviews knowledge about the pathophysiology of severe pulmonary emphysema and the current innovative interventional and minimally invasive therapeutic concepts for the management of these advanced stages of emphysema based on the best scientific evidence This guide provides to multidisciplinary pulmonary boards of experts in advanced lung diseases current criteria for the choice of precision therapeutic options and beyond to maintaining optimized medical treatment to controlling lung hyperinflation and alleviating patients symptoms This book is a valuable resource for clinicians dealing with critically ill patients with COPD

Eye movement-related brain activity during perceptual and cognitive processing Andrey R. Nikolaev, Sebastian Pannasch, Junji Ito, Artem Belopolsky, 2014-09-23 The recording and analysis of electrical brain activity associated with eye movements has a history of several decades While the early attempts were primarily focused on uncovering the brain mechanisms of eye movements more recent approaches use eye movements as markers of the ongoing brain activity to investigate perceptual and cognitive processes This recent approach of segmenting brain activity based on eye movement behavior has several important advantages First the eye movement system is closely related to cognitive functions such as perception attention and memory This is not surprising since eye movements provide the easiest and the most accurate way to extract information from our visual environment and the eye movement system largely determines what information is selected for further processing The eye movement based segmentation offers a great way to study brain activity in relation to these processes Second on the methodological level eye movements constitute a natural marker to segment the ongoing brain activity This overcomes the problem of introducing artificial markers such as ones for stimulus presentation or response execution that are typical for a lab based research This opens possibilities to study brain activity during self paced perceptual and cognitive behavior under naturalistic conditions such as free exploration of scenes Third by relating eye movement behavior to the ongoing brain activity it is possible to see how perceptual and cognitive processes unfold in time being able to predict how brain activity eventually leads to behavior This research topic illustrates advantages of the combined recording and analysis of eye movements and neural signals such as EEG local field potentials and fMRI for investigation of the brain processes in humans and animals The contributions include research papers methodology papers and reviews demonstrating conceptual and methodological achievements in this rapidly developing field **Flexible**

One of the hallmarks of the 21st century medicine is the emergence of digital therapeutics. DTx evidence-based clinically validated digital technologies to prevent, diagnose, treat, and manage various diseases and medical conditions. DTx solutions have been gaining interest from patients, investors, healthcare providers, health authorities, and other stakeholders because of the potential of DTx to deliver equitable, massively scalable, personalized, and transformative treatments for different unmet medical needs. *Digital Therapeutics: Scientific, Statistical, Clinical, and Regulatory Aspects* is an unparalleled summary of the current scientific, statistical, developmental, and regulatory aspects of DTx, which is poised to become the fastest growing area of the biopharmaceutical and digital medicine product development. This edited volume intends to provide a systematic exposition to digital therapeutics through 19 peer-reviewed chapters written by subject matter experts in this emerging field. This edited volume is an invaluable resource for business leaders and researchers working in public health, healthcare, digital health, information technology, and biopharmaceutical industries. It will be also useful for regulatory scientists involved in the review of DTx products and for faculty and students involved in an interdisciplinary research on digital health and digital medicine.

Key Features: Provides the taxonomy of the concepts and a navigation tool for the field of DTx. Covers important strategic aspects of the DTx industry, thereby helping investors, developers, and regulators gain a better appreciation of the potential value of DTx. Expounds on many existing and emerging state-of-the-art scientific and technological tools, as well as data privacy, ethical, and regulatory considerations for DTx product development. Presents several case studies of successful development of some of the most remarkable DTx products. Provides some perspectives and forward-looking statements on the future of digital medicine.

Chinese Maritime Cases Martin Davies, Jiang Lin, 2025-06-15

China, the Mainland of PRC, trades with other states in trillions of USD every year, and about 95% of the cargoes are carried by ocean-going ships calling at hundreds of Chinese ports each single day. Due to the enormous trade volume and shipping activities, foreign ships, companies, and professionals are often caught in the Chinese maritime law and court. The foreign parties involved in Chinese litigation or dispute resolution and their lawyers are more and more enthusiastic to study Chinese maritime cases in order to deal with their own cases properly or, if possible, predicate the potential risks and avoid the disputes outright. However, to date, no Chinese series casebook has ever been published. Now, for the first time, the authors offer this series casebook of delicately selected Chinese maritime judgments. Each year, the book selects a number of leading innovative and influential Chinese maritime judgments and presents full English translation of them together with summary to the readers so that they can have insights of how the Chinese maritime judges interpret, apply, and develop Chinese maritime law in practice. The book will benefit the worldwide students, academics, practitioners.

and industrial people who may be engaged in international trade shipping insurance and other transactions concerning China
The book will also indemnify to certain extent the situation that there is lack of authoritative sources available to foreign
personnel to look into how Chinese justice system functions and grows in real life Who's who in Special Libraries Special
