Doctoral Examination: Exploring Practice Across the Globe Vijay Kumar, Stan Taylor, Sharon Sharmini, 2022-11-30 This book considers how the main doctoral awarding countries from across the globe examine doctoral degrees It compares and contrasts their approaches comments on their robustness and identifies examples of good practice The doctorate is the highest award made by universities but the examination process involved varies considerably in form and structure across the globe This book studies the similarities and differences systematically on a cross national basis providing insights into the ways in which countries have sought to ensure that the awarded degree is comparable in standards This book presents case studies of examination policies and practices covering 20 countries which collectively are responsible for nearly 75% of global doctoral awards Each chapter includes a summary of the key points and a concluding chapter analyses the case studies from a comparative perspective This book is written by a distinguished international team of authors who are researchers in doctoral education and will be of interest to all those engaged in the field particularly policy makers graduate deans and programme leaders supervisors administrators examiners and scholars in the field

Public Investment Plan Uganda, Uganda. Ministry of Finance and Economic Planning, 2015 Artificial Intelligence (AI)

and Finance Bahaaeddin A. M. Alareeni, Islam Elgedawy, 2023-08-26 Artificial intelligence AI has the potential to significantly improve efficiency reduce costs and increase the speed and accuracy of financial decision making making it an increasingly important tool for financial professionals One way that AI can improve efficiency in finance is by automating tasks and processes that are time consuming and repetitive for humans For example AI algorithms can be used to analyze and process large amounts of data such as financial statements and market data in a fraction of the time that it would take a human to do so This can allow financial professionals to focus on higher value tasks such as interpreting data and making strategic decisions rather than being bogged down by mundane tasks AI can also reduce costs in finance by increasing automation and eliminating the need for certain tasks to be performed manually This can result in cost savings for financial institutions which can then be passed on to customers in the form of lower fees or better services AI can be used to identify unusual patterns of activity that may indicate fraudulent behavior This can help financial institutions reduce losses from fraud and improve customer security AI powered chatbots and virtual assistants can help financial institutions provide faster more efficient customer service particularly when it comes to answering common questions and handling routine tasks Some financial institutions are using AI to analyze market data and make trades in real time AI powered trading algorithms can potentially make faster and more accurate trading decisions than humans In terms of speed and accuracy AI algorithms can analyze data and make decisions much faster than humans and can do so with a high degree of accuracy This can be particularly useful in fast moving financial markets where quick and accurate decision making can be the difference between success and failure This book highlights how AI in finance can improve efficiency reduce costs and increase the speed and accuracy of financial decision making Moreover the book also focuses on how to ensure the responsible and ethical use of AI in finance This book is a valuable resource for students scholars academicians researchers professionals executives government agencies and policymakers interested in exploring the role of artificial intelligence AI in finance Its goal is to provide a comprehensive overview of the latest research and knowledge in this area and to stimulate further inquiry and exploration

Beyond the Global Land Grab Gustavo de L. T. Oliveira, Juan Liu, Ben M. McKay, 2021-11-17 The conjunction of climate food and financial crises in the late 2000s triggered renewed interest in farmland and agribusiness investments around the world This phenomenon became known as the global land grab and sparked vibrant debates among social movements NGOs international development agencies and various government agencies and academics worldwide This book addresses four key areas that are moving the debate beyond land grabs These include the role of contract farming and differentiation among farm workers in the consolidation of farmland the broader forms of dispossession and mechanisms of control and value grabbing beyond classic land grabs for agricultural production discourses about and responses to Chinese agribusiness investments abroad and the relationship between financialization and land grabbing The chapters in this edited volume propose new directions to deepen and even transform the research agenda on land struggles and agro industrial
