development contribute to social unrest and exacerbate existing state society tensions what this book refers to as structural violence For China such outcomes lead to instability within its peripheral environment and raise its vulnerability to security threats stemming from nationalism separatism terrorism transnational organised crime and drug trafficking among others This book explores the causality between China s economically reliant foreign policy and insecurity in its weak peripheral states and considers the implications for China s security environment and foreign policy This book will be of much interest to students of Chinese politics Asian security studies international political economy and IR in general
