Hamilton, 2018-09-17 The emergence and adoption of metallurgy is one of the seminal topics of investigation in the history of archaeology particularly in the history of archaeological research in Southeast Asia The site of Ban Chiang Thailand is a central site in debates surrounding the chronology and significance of early metallurgy in the region This book is the first in a series of four volumes that review the contributions of Ban Chiang and three related sites in northeast Thailand excavated by the Penn Museum to an understanding early metallurgy in Thailand As the study of archaeometallurgy is a complex topic that draws on numerous technical and social science disciplines this introductory volume presents in several chapters the background needed to assess the metal and related evidence presented in the subsequent volumes in this series A history of perspectives on the role of metals in ancient societies generally and Southeast Asia specifically is provided Other chapters debunk the conventional paradigm for understanding metals and society and provide current theoretical perspectives and new paradigms for the study of ancient metals The geological basis for the presence and location of metal ore resources in the region is reviewed The final chapter presents a technical overview of ways material properties of ancient metals may be studied While providing a background to the study of metals at Ban Chiang the volume also reviews synthesizes and repositions the method and theory for the study of archaeometallurgy generally Thai Archaeology Monograph Series 2A University Museum Monograph 149 **Assessing Academic Literacy in a Multilingual Society** Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience Code of Federal Regulations, 2016 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries *Imperial Peripheries in the Neo-Assyrian Period* Craig W. Tyson, Virginia R. Herrmann, 2019-01-15 Though the Neo Assyrian Empire has largely been conceived of as the main actor in relations between its core and periphery recent work on the empire's peripheries has encouraged archaeologists and historians to consider dynamic models of interaction between Assyria and the polities surrounding it *Imperial Peripheries in the Neo Assyrian Period* focuses on the variability of imperial strategies and

local responses to Assyrian power across time and space An international team of archaeologists and historians draws upon both new and existing evidence from excavations surveys texts and material culture to highlight the strategies that the Neo Assyrian Empire applied to manage its diverse and widespread empire as well as the mixed reception of those strategies by subjects close to and far from the center Case studies from around the ancient Near East illustrate a remarkable variety of responses to Assyrian aggression economic policies and cultural influences As a whole the volume demonstrates both the destructive and constructive roles of empire including unintended effects of imperialism on socioeconomic and cultural change Imperial Peripheries in the Neo Assyrian Period aligns with the recent movement in imperial studies to replace global top down materialist models with theories of contingency local agency and bottom up processes Such approaches bring to the foreground the reality that the development and lifecycles of empires in general and the Neo Assyrian Empire in particular cannot be completely explained by the activities of the core The book will be welcomed by archaeologists of the Ancient Near East Assyriologists and scholars concerned with empires and imperial power in history Contributors Stephanie H Brown Anna Cannav Megan Cifarelli Erin Darby Bleda S D ring Avraham Faust Guido Guarducci Bradley J Parker
