Peter Becker, Barbara Humberstone, Chris Loynes, Jochem Schirp, 2018-06-12 The Changing World of Outdoor Learning in Europe sets out to provide a comprehensive analysis of the economical and political changes that have occurred in European outdoor culture in the preceding two decades from a diverse range of perspectives including institutional theoretical national and educational views The book looks at how outdoor education has been transformed into an increasingly global field where established and influenced practices have been introduced into modernising and democratising nations With contributions from the members of the board of the European Institute of Outdoor Adventure Education and Experiential Learning and representatives of the networks that stand behind it this unique book provides thorough factual analyses and examinations of outdoor learning that have never been presented before The book contains contributions from across Europe with authors from the UK Germany Finland Sweden Slovenia Poland Norway and the Czech Republic Chapters within the volume by non European authors provide another perspective on the European story in a wider context As a whole the book will stimulate the ongoing debate about the nature function and organisation of outdoor education around the globe The Changing World of Outdoor Learning in Europe will be of great interest to academics researchers and postgraduate students in the fields of outdoor education leadership and recreation and outdoor sport environmental and leisure studies It should also be essential reading for those involved in outdoor organisations in Europe and worldwide **Evolution Education Around the Globe**

Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe. **Handbook of Research on Integrating Computer Science and Computational Thinking in K-12 Education** Keengwe, Jared, Wachira, Patrick, 2019-12-13 As technology continues to develop and prove its importance in modern society, certain professions are acclimating. Aspects such as computer science and computational thinking are becoming essential areas of study. Implementing these subject areas into teaching practices is necessary for younger generations to adapt to the developing world. There is a critical need to examine the pedagogical implications of these technological skills and implement them into the global curriculum. The Handbook of Research on Integrating Computer Science and Computational Thinking in K-12 Education is a collection of innovative research on the methods and applications of computer science curriculum development within primary and secondary education. While highlighting topics including pedagogical implications, comprehensive techniques, and teacher preparation models, this book is ideally designed for teachers, IT consultants, curriculum developers, instructional designers, educational software developers, higher education faculty, administrators, policymakers, researchers, and graduate students. **Brains, Media and Politics** Rodolfo Leyva, 2019-11-25 Following the 2007-2008 global financial crisis, a number of prominent academics, journalists, and activists were quick to pronounce the demise of neoliberal capitalism and governance. This rather optimistic prediction, however, underestimated the extent to which neoliberalism has shaped the 21st-century world order and become entrenched in our sociopolitical and cognitive fabric. Indeed, 11 years after the crisis and in spite of the significant levels of socioeconomic inequality, psychological distress, and environmental destruction generated by neoliberal policies and corresponding business and cultural practices, the ideological hegemony of neoliberalism has not been supplanted nor has it really faced any serious unsettling. How, then, has neoliberalism inflected and shaped our common sense understandings of what is politically, economically, and culturally viable? To help answer this question, this book combines leading theories from sociology, media,

communication research developmental psychology and cognitive science and draws on primary evidence from a unique mix of ethnographic survey and experimental studies of young people's leisure practices and educational experiences of young adults political socialisation processes in relation to exposure to social networking sites and of the effects of commercial media viewing on material values and support for social welfare In doing so it provides a nuanced and robustly empirically tested account of how the conscious and non conscious cognitive dimensions of people's subjectivities and everyday social practices become interpellated through and reproductive of neoliberal ideology As such this book will appeal to scholars across the social and behavioural sciences with interests in neoliberalism political engagement enculturation social reproduction and media effects
