Lockyer, 2008 **Disseminating Behavioral Research** Annette K. Griffith, Tyler C. Ré, 2023-12-09 Dissemination is a key component of the research process While several fields have developed resources dedicated to training and supporting their scientists and practitioners as they are encouraged to disseminate within their fields and to the larger public audience there has been a lack of formal guidance for dissemination within the behavioral sciences Disseminating Behavioral Science aims to fill that gap providing guidance across modalities for topics ranging from the peer review process to conference presentation to nontraditional avenues for dissemination The contents of this edited text divided across six sections serves as a roadmap for students junior researchers and senior scholars The first section includes types of academic scholarship types of dissemination and strategies to ensure ethical dissemination The second reviews traditional publication preparation including tips for the writing process and key components to include in each section of a scientific manuscript Section Three explores publication within a traditional peer reviewed journal Section Four outlines additional strategies to get research publicly recognized through conference presentations social media and popular media sources and white and grey literature Sections Five and Six offer a consolidated glossary of all key terms in the text and combined reference list **Good**

**Research Practice in Non-Clinical Pharmacology and Biomedicine** Anton Beshpalov, Martin C. Michel, Thomas Steckler, 2020-02-20 This open access book published under a CC BY 4.0 license in the Pubmed indexed book series Handbook of Experimental Pharmacology provides up to date information on best practice to improve experimental design and quality of research in non clinical pharmacology and biomedicine Enhancing Scientific Reproducibility in Biomedical Research Through Transparent Reporting National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Board on Health Sciences Policy, Roundtable on Genomics and Precision Health, National Cancer Policy Forum, Forum on Neuroscience and Nervous System Disorders, Forum on Drug Discovery, Development, and Translation, 2020-04-28 Sharing knowledge is what drives scientific progress each new advance or

innovation in biomedical research builds on previous observations. However, for experimental findings to be broadly accepted as credible by the scientific community, they must be verified by other researchers. An essential step is for researchers to report their findings in a manner that is understandable to others in the scientific community and provide sufficient information for others to validate the original results and build on them. In recent years, concern has been growing over a number of studies that have failed to replicate previous results, and evidence from larger meta-analyses which have pointed to the lack of reproducibility in biomedical research. On September 25 and 26, 2019, the National Academies of Science, Engineering, and Medicine hosted a public workshop in Washington, DC, to discuss the current state of transparency in the reporting of preclinical biomedical research and to explore opportunities for harmonizing reporting guidelines across journals and funding agencies. Convened jointly by the Forum on Drug Discovery, Development, and Translation, the Forum on Neuroscience and Nervous System Disorders, the National Cancer Policy Forum, and the Roundtable on Genomics and Precision Health, the workshop primarily focused on transparent reporting in preclinical research but also considered lessons learned and best practices from clinical research reporting. This publication summarizes the presentation and discussion of the workshop.

**Technical Writing for Teams** Alexander Mamishev, Sean Williams, 2011-02-11

A unique integrative team-centered approach to writing and formatting technical documents. Technical Professionals: Do you have difficulty producing high-quality documents with multiple contributors when faced with a tight deadline? Do you need a process that enables global team members to collaborate online as they produce sophisticated documents? Do you prefer the ease of a WYSIWYG desktop publishing tool like Microsoft Word rather than more complex software like LaTeX? Professors and Graduate Students: Do you want to streamline the process of writing multi-investigator papers, reports, proposals, and books? Do you spend a lot of time formatting documents instead of thinking and writing? Do you write research papers in Microsoft Word and then need to convert them to LaTeX for your thesis? Do you write research papers in LaTeX and then need to convert them to Microsoft Word when embarking on collaborations with your colleagues from industry? Undergraduate Students: Do you need to write a research paper and don't know where to start? Do you need to collaborate with classmates on a long paper and find yourself lost in organizational details rather than immersed in the content? If you answered yes to any of these questions, *Technical Writing for Teams: The STREAM Tools Handbook* is for you. It provides an easy-to-learn system that streamlines individual and collaborative writing, allowing you and your teams to instantly become more productive and create the highest quality documents in a minimum amount of time. Introduced here are the STREAM Tools: Scientific and Technical Writing, Editing, and File Management Tools, which unlock your collaborators' potential and address team dynamics, separation of duties, and workflow. You'll see how to ensure compatibility among multiple writers, achieve consistent formatting, organize content, integrate bibliographic databases, automate the process of document preparation, and move content between Microsoft Word and LaTeX. Checklists, guidelines, and success stories are

also included to help you operate as efficiently as possible From planning and editing documents to solving common team writing problems to managing workflow Technical Writing for Teams The STREAM Tools Handbook is the one stop reference that allows teams to collaborate successfully and create unified effective documents     **Illustrating Nature** ,2004
