## Just One Thing The Alexanders 6:

**Alternative Concepts of God** Andrei A. Buckareff, Yujin Nagasawa, 2016 The concept of God according to traditional Judeo Christian Islamic theism minimally includes the following theses i There is one God ii God is an omniscient omnipotent and morally perfect agent iii God is the creator ex nihilo of the universe and the sustainer of all that exists and iv God is an immaterial substance that is ontologically distinct from the universe Proponents of alternative concepts of God such as pantheism panentheism religious anti realism developmental theism and religious naturalism exclude at least one of these claims A number of prominent philosophers and scientists have expressed sympathy with alternative concepts of the divine However voices raised in defense of these concepts tend not to be taken seriously in contemporary analytic philosophy of religion This volume aims to shed light on alternative concepts of God and to thoroughly consider their merits and demerits The contributors are leading analytic philosophers of religion including critics of these views as well as sympathizers This is the first contemporary edited collection featuring the work of analytic philosophers of religion covering such a wide range of alternative concepts of God

Taylor, 2015-01-01 An insightful new look at one of the 20th century's most celebrated artistic visionaries Alexander Calder 1898 1976 is one of modernism's most captivating and influential figures First trained as a mechanical engineer Calder relocated from New York to Paris in the mid twenties where his acceptance into the city's burgeoning avant garde circles coincided with the development of his characteristic form of kinetic sculpture His early work *Cirque Calder* which was presented throughout Paris to great acclaim prefigures the performance and theatrical aspects that dominate Calder's pioneering artistic works and are situated as a primary subject of intrigue in this publication Rather than simply refashion sculpture's traditional forms Calder envisioned entirely new possibilities for the medium and transformed its static nature into something dynamic and responsive *Alexander Calder Performing Sculpture* provides detailed insight into that pioneering process through reproductions of personal drawings and notes Also featured is new research from a wide range of renowned scholars
