Commercial America ,1922 **Environmental Politics and Foreign Policy Decision Making in Latin America** Amy Below,2014-12-05 Although the Kyoto Protocol an international agreement to address global climate change has been regarded by many as an unsuccessful treaty both politically and environmentally it stands as one of the world's few truly global agreements Why did such a diverse group of countries decide to sign and or ratify the treaty Why did they choose to do so at different times and in different ways What explains their foreign policy behavior Amy Below's book builds off the increasing significance of climate change and uses the Kyoto Protocol as a case study to analyze foreign policy decision making in Latin America Below's study takes a regional perspective in order to examine why countries in Latin America made disparate foreign policy choices when they were faced with the same decision The book looks at the decisions in Argentina Mexico and Venezuela via a process tracing method Below uses information obtained from primary and secondary documents

and elite interviews to help reconstruct the processes and augments her reconstruction with a content analysis of Conference of the Parties speeches by presidents and country delegates The book complies with convention in the field by arguing that systemic national and individual level factors simultaneously impact foreign policy decisions but makes the additional claim that role theory most accurately accounts for relationships between variables Environmental Politics and Foreign Policy Decision Making in Latin America considers a variety of factors on individual national and international levels of analysis and show that the foreign policy decisions are best viewed through the prism of role theory The book also draws conclusions about the value of role theory in general and about environmental foreign policy decisions in developing countries which will be of value to both policy makers and academics

The Making of African America Ira Berlin, 2010-01-21 A leading historian offers a sweeping new account of the African American experience over four centuries Four great migrations defined the history of black people in America the violent removal of Africans to the east coast of North America known as the Middle Passage the relocation of one million slaves to the interior of the antebellum South the movement of more than six million blacks to the industrial cities of the north and west a century later and since the late 1960s the arrival of black immigrants from Africa the Caribbean South America and Europe These epic migrations have made and remade African American life Ira Berlin's magisterial new account of these passages evokes both the terrible price and the moving triumphs of a people forcibly and then willingly migrating to America In effect Berlin rewrites the master narrative of African America challenging the traditional presentation of a linear path of progress He finds instead a dynamic of change in which eras of deep rootedness alternate with eras of massive movement tradition giving way to innovation The culture of black America is constantly evolving affected by and affecting places as far away from one another as Biloxi Chicago Kingston and Lagos Certain to garner widespread media attention The Making of African America is a bold new account of a long and crucial chapter of American history
