## **Making Waves Guide:**

**Making Waves** Doug Nuenke, 2014-02-27 *Making Waves* paints a clear picture of what a grace filled life is receiving God's goodness and passing it along to others like a ripple that grows into a wave. Over time this wave of grace can flow to impact families and communities even crossing oceans and national boundaries. No matter where you are on your spiritual journey *Making Waves* will show you how to fully experience life by embracing the grace of God and passing along the reality of Jesus to others.

*Teaching Mathematics in Colleges and Universities* Solomon Friedberg, 2001 Progress in mathematics frequently occurs first by studying particular examples and then by generalizing the patterns that have been observed into far reaching theorems. Similarly in teaching mathematics one often employs examples to motivate a general principle or to illustrate its use. This volume uses the same idea in the context of learning how to teach. By analyzing particular teaching situations one can develop broadly applicable teaching skills useful for the professional mathematician. These teaching situations are the Case Studies of the title. Just as a good mathematician seeks both to understand the details of a particular problem and to put it in a broader context the examples presented here are chosen to offer a serious set of detailed teaching issues and to afford analysis from a broad perspective. Each case raises a variety of pedagogical and communication issues that may be explored either individually or in a group facilitated by a faculty member. Teaching notes for such a facilitator are included for each Case in the Faculty Edition. The methodology of Case Studies is widely used in areas such as business and law. The consideration of the mathematics cases presented here will help readers to develop teaching skills for their own classrooms.

**The Rough Guide to the Energy Crisis** David Buchan, 2012-06-21 *The Rough Guide to the Energy Crisis* is a comprehensive guide to the workings of today's energy world explaining the seductive nature of fossil fuels and the reasons why international climate change negotiations are proving so difficult. If you're interested in escaping the trap of fossil fuels and moving to a low carbon world this is the guide for you. Realistically looking at the pitfalls pressures and prospects for renewable energy. *The Rough Guide to the Energy Crisis* also shows that there is hope in new energy conservation techniques made possible by smart grids and smart metering. You'll also discover energy security issues and future tensions that could occur like the possibility of the lights going out jeopardising public support for a world of cleaner energy.

*Experimental Hydrodynamics for Flow Around Bodies* Viktor V. Babenko, 2021-01-29 *Experimental Hydrodynamics for Flow around Bodies* explains complex novel experimental methodologies to solve a wide range of important flow problems in industry and research. The book starts by examining the fundamental physical laws necessary for the optimization of techniques for hydro aeromechanics heat engineering and other disciplines related to flow. The reader is then provided with detailed explanations of novel experimental methods along with the results of physical research. These results are also necessary for the construction of theoretical models that provide improved descriptions for numerous problems in various scientific fields.

Frequent discussions examples of practical applications throughout the text and foundational theoretical materials help a range of readers engage and apply these methods to problems in fields including drag reduction noiseless movement optimal maneuvering intense heat transfer control of separated vortices wind power economical energy consumption and more Provides instructions on the set up of innovative experiments for drag reduction that will be of great interest to researchers in aerospace marine and automotive engineering Describes in detail a variety of novel experiments to investigate boundary layer flow together with experimental data that can be used with computational models Assists with bio inspired hydrodynamic design by providing models of a waving fin mover and investigations of analogs of hydrobiont skin covers
