

Mamiya DM28 System

mamiya

Overview

The Mamiya DM System is made for photographers who take their art seriously and passionately. It offers 35mm handling, fully customisable settings and the highest level of image quality.

RAW images are captured at 16-bit to produce files with high resolution, exceptional color richness and accuracy and exquisite detail, using 33, 28 and 22 megapixel sensors.

A comprehensive range of 16 precision lenses are available for the Mamiya DM System, all constructed drawing on over 60 years of experience and innovation.

For demanding daylight situations and motion freeze, there are three leaf shutter lenses, developed in collaboration with renowned Schneider Kreuznach optics company.

For other photographic genres, there are lenses suited for landscape, portraiture, fashion, architecture, table-top and macro work.

With a Mamiya DM System, you are instantly elevated to master status.

of properties should significantly widen the camera's appeal to high end enthusiasts as well as a broad range of professional photographers. The use of a backside illuminated BSI sensor means that the light collecting elements of the sensor are closer to the surface of the chip. This should not only increase the efficiency of the sensor improving low light performance but should also be expected to make the pixels near the edges of the sensor better able to accept light approaching with high angles of incidence improving peripheral image quality. Taking the perfect shot requires more than just years of experience and good lighting. Knowing Your camera and what it offers you is a primary requirement and this Nikon D850 manual provides clear step by step instructions to help you take full advantage of your camera. Here's a preview of what you'll learn. Learn about each button on your camera. Understand the settings. Get better photos in auto or manual mode. Shoot view and edit movies. Whatever the occasion you're shooting for you'll get all the guidance you need to take excellent photos from now.
