Science Fact and Science Fiction Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

The Mammoth Book of Time Travel SF Mike Ashley, 2013-07-04 This thought provoking collection not only takes us into the past and the future but also explores what might happen if we attempt to manipulate time to our own advantage These stories show what happen once you start to meddle with time and the paradoxes that might arise It also raises questions about whether we understand time and how we perceive it Once we move outside the present day can we ever return or do we move into an alternate world What happens if our meddling with Nature leads to time flowing backwards or slowing down or stopping all together Or if we get trapped in a constant loop from which we can never escape Is the past and future immutable or will we ever be able to escape the inevitable These are just some of the questions that are raised in these challenging exciting and sometimes amusing stories by Kage Baker Simon Clark Fritz Leiber Christopher Priest Kristine Kathryn Rusch Robert Silverberg Michael Swanwick John Varley and many others
