Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

**Sustainability and Financial Services in the Digital Age** Nadia Mansour, Lorenzo M. Bujosa Vadell, 2024-10-21 This volume examines how innovation and digital transformation impact the financial and accounting sectors Featuring selected contributions from the third Finance Accounting and Law in the Digital Age conference 2024 held at the University of Salamanca Spain the contributions of this book explore the development of digital finance and the complicated equation between financial stability the security of investors and financial consumers sustainable finance and support for innovation Climate change and the exponential growth of technology have built an explosion of financial innovation The digital revolution has recently reached the financial sector protected by a specific regulatory environment The volume describes how all areas of finance are now invested by new players who are transforming the banking and financial landscape to create a novel digital ecosystem
