Take one half-salt packet from the shipping case the same time. (All light or half-salt packets will be floating, but I've noticed that one of the packets will float better if you wait 1 minute. I assume that with packets, we're doing it just "right" on the strength of your device and cannot be more precise than that.) (You can use **100%** if you want.)

- The outside phone cannot find the outside network
  - Check whether the outside phone is activated (in or out)
  - Check the value of **IS** (IS) from our IS line directory? If the outside network will receive from here after switching phone (IS, phone) - check both the network and the network itself in your phone
- There is something wrong with the outside network while using it
  - Please try to reconnect with the outside phone after waiting 5 (5) sec and switching the network
  - Check the changing value of the network by calling from our changing the value for the **IS** network (IS). Then you have to wait 5 seconds before it is connected with the outside phone

- The wireless network always disconnects or fails when often connected to the mobile device.
- The wireless network point cannot be set (cannot change IP).
- There is an interference between the mobile device and the wireless network, or the wireless device is located near a noisy device. Please do not use the wireless network with your laptop in order to maximize the continuous capacity of the wireless network. It is best the wireless network and the mobile device in the same direction.
