**Kansas Citian**, 1915 *Civitas/What is City?* Theresa Genovese, Linda Eastley, Deanna Snyder, 1998 What constitutes a city How does human settlement in a specific site create a civilization Civitas the latest issue of the Harvard Architectural Review presents a series of provocative responses to these questions Architects critics educators and planners investigate the conflict between contemporary constructs of human settlement and more traditional definitions of cities Through a combination of projects and theoretical essays Civitas aims to provide a more diverse understanding of the nature of urbanism and community The conception of community as an orderly or focused environment in the landscape is an expression predominantly derived from the Western medieval city and perception This idea has been copied transformed and even romanticized but today its structure is no longer the image that dominates the landscape from the introduction to Civitas

**Environment & Planning**, 2012 **Transmigratory Moves** Congress on Research in Dance. Conference, 2001 This

year's conference explores the ways in which dance forms circulate across communities, regions and nations, acquiring new meanings as they travel. While the term globalization has gained currency in scholarly debates of recent years, the dispersion of performance practices is hardly a new phenomenon. Thus the conference includes both historical and contemporary analyses of dances, migrations. What happens when dances migrate? It is common knowledge that founding figures in European and Euro-American modern dance appropriated Asian movement vocabularies in their choreographies. But scholars are only beginning to examine the ways in which Latin American, African and Asian folkloric dance convention has been inflected by European concert dance training and stage practice as well as MTV choreographers. By focusing on the circulation of movement styles, pedagogies and performance conventions, we hope to trouble some of the categorical distinctions which have tended to divide dance research between Western and non-Western, classical and folkloric and ritual, social and theatrical genres. Arguably the histories of many contemporary dance forms are more complex than such restrictive categories would admit.
