Management Communication Richard Schwindt, 1995

Handbook of Business Discourse Francesca

Bargiela-Chiappini, 2009-05-12 The Handbook of Business Discourse is the most comprehensive overview of the field to date. It offers an accessible and authoritative introduction to a range of historical disciplinary methodological and cultural perspectives on business discourse and addresses many of the pressing issues facing a growing varied and increasingly international field of research. The collection also illustrates some of the challenges of defining and delimiting a relatively recent and eclectic field of studies including debates on the very definition of business discourse. Part One includes chapters on the origins, advances and features of business discourse in Europe, North America, Australia and New Zealand. Part Two covers methodological approaches such as mediated communication, corpus linguistics, organisational discourse, multimodality, race and management communication and rhetorical analysis. Part Three moves on to look at disciplinary perspectives such as sociology, pragmatics, gender studies, intercultural communication, linguistic anthropology and business communication. Part Four looks at cultural perspectives across a range of geographical areas including Spain, Brazil, Japan, Korea, China and Vietnam. The concluding section reflects on future developments in Europe, North America and Asia.

Integrated Business Communication Bonnye E. Stuart, Marilyn S. Sarow, Laurence Stuart, 2007-04-23 This book applies communication concepts and issues from various fields such as marketing, public relations, management and organizational communication and packages them into a dynamic new approach: Integrated Communication. It is designed to give business students a basic knowledge and broad overview of communication practices in the workplace. Ultimately, the book should be seen as a practical guide to help students understand that communication is key to decision making and fundamental to success in a global marketplace. The book uses an interdisciplinary approach to its discussion of integrated communication by incorporating theory, application and case studies to demonstrate various concepts. Theory is introduced when necessary to the understanding of the practical application of the various concepts. Integrated Business Communication is broad enough in scope and method to be used as a core text in business communication. Case studies are an integral part of the material.

Something New Under the Sun Helen Gavaghan, 2012-12-06 In this the first history of artificial satellites and their uses, Helen Gavaghan shows how the idea of putting an object in orbit around the earth changed from science fiction to indispensable technology in the twinkling of an eye. Thanks to satellites, we can now send data and images anywhere in the world in an instant. The satellite-based navigational system can pinpoint your exact location anywhere in the world; it is so precise that from outer space it can detect the sag on an airplane's wing. Focusing on three major areas of development: navigational satellites, communications and weather observation and forecasting, Gavaghan tells the remarkable inside story of how obscure men and women, often laboring under strict secrecy, made the extraordinary scientific and technological

discoveries needed to make these miracles happen Written by a science journalist with support from the Sloane Foundation the book describes the birth of the modern scientific era in the twentieth century with creation of satellite technology The narrative is part history beginning with the Russian U S contest with the launch of Sputnik part politics as scientists and visionary engineers compete for scarce funding that will bring their dreams to reality partly the story of the singular and fascinating individuals who were present at the creation of our modern technological era
