**Management Control Systems** Kenneth A. Merchant, Wim A. Van der Stede, 2023 *Management Control Systems and Cross-Cultural Research* Michael Hanzlick, 2015-01-31 A fundamental challenge that management faces in the twenty first century is how to exercise adequate control i e how to guide and direct the behaviour of their subordinates With increasing globalisation firms witness a cross cultural impact too Of particular interest is the question of whether to use the standardized form of control similar to the home base of firms or whether to adapt their control practices to the local specificities Given the meagre state of the literature in management control with a cross cultural emphasis this study addresses a real world problem namely the question whether management control practices are configured similarly or differently across cultures Relying on a generalized industry sample across four countries Belgium Canada Germany and Poland this study sought to shed light on one of the more intriguing questions does culture matter for specific control areas in particular for performance measurement performance evaluation and reward systems The theoretical foundations are grounded in the cultural framework of the GLOBE project accompanied by thoughts of new institutionalism stakeholder

theory and contingency thoughts Hypotheses are tested by mean comparisons ANOVA ANCOVA The empirical findings highlight cultural differences for a broader set of control practices and deliver new insights into the intersection of culture and management control This dissertation crafts a novel topic with high relevance for both researchers and practitioners The study demonstrates areas for which management control practices should be adapted to the local needs and areas for which those practices could be harmonized in the whole company This monograph stresses some areas in which future empirical cross cultural research can benefit and some areas where conceptual thoughts could be advanced *Frontiers of Japanese Management Control Systems* Eri Yokota, 2023-04-10 This book provides a multilateral view of Japanese management control systems MCS presents the frameworks of MCS theory and integrates those systems based on quantitative and qualitative research Readers will learn how Japanese MCS were investigated by researchers and why they chose the existing frameworks Not only are the topics clarified with regard to Japanese MCS empirical evidence from Japan is also provided At the outset the frameworks of MCS used by Japanese researchers are explained and the reasons they choose those frameworks are investigated Following that exploration readers are shown a close examination of MCS which are thought to be difficult to understand in Japan In Japanese companies however these systems are generally used so in other words Japanese companies use MCS without considering its frameworks It is a baffling phenomenon thus a fine topic of research After a comprehensive review of the literature the current status of Japanese MCS is presented by using both quantitative and qualitative research By the end of the book readers will have a firm grasp of how Japanese firms use MCS and what MCS means for Japanese companies *Management Control System in Smart and Sustainable Firms* Domenica Lavorato, 2025-02-26 In today's competitive environment smart technologies are increasingly recognized as key enablers of corporate sustainability In this new context corporate management control systems integrate with the issues of smart technologies sustainability and inter and intra organizational collaboration as the driving elements of the firm of the future This book proposes a management control framework for today's firms It investigates the effectiveness of traditional management control systems in today's competitive environment and identifies potential limitations that may hinder their ability to effectively monitor modern organizations Furthermore the book explores whether these systems can be improved with complementary tools or if entirely new mechanisms are required The book argues the need to adopt a new approach to control and a different lens for evaluating the activity of guiding the achievement of corporate objectives paving the way for the conceptualization of a new management control system **Management Control Systems in Complex Settings: Emerging Research and Opportunities** Zanin, Filippo, Comuzzi, Eugenio, Costantini, Antonio, 2017-12-08 Organizations are constantly creating original initiatives product lines or implementing new workflows to remain competitive in the contemporary business world Employing optimum methods for efficient performance and timely completion of tasks is vital to the success of a business Management Control Systems in Complex Settings Emerging Research and Opportunities is a
