*Unplugging the Classroom* Hilary Anne Wilder, Sharmila Pixy Ferris, 2017-05-17 *Unplugging the Classroom Teaching with Technologies to Promote Students Lifelong Learning* provides techniques to help teaching and learning in an age where technology untethers instruction from the classroom from semester seat time and from a single source of expertise The book brings together researchers and practitioners from diverse academic fields including library perspectives and presents interdisciplinary discussions from both theoretical and applied areas It is unique in its goal of bringing educators and librarians together to explore the challenges that are faced by students and faculty in any time any place any path and any pace learning In spite of the fact that the mobile revolution has definitively arrived students and faculty alike aren't ready to make the leap to mobile learning The pressures of technological advances along with the changing nature of learning will demand increasingly profound changes in education Researchers have begun to address this issue but the revolution in mobile communication has not been accompanied by a concomitant growth in pedagogical resources for educators and students More importantly such growth needs to be undergirded by sound learning theories and examples of best practice Provides a hands on resource useful to both novices and experts for technology enabled teaching and learning Gives both discipline specific and cross disciplinary perspectives Discusses discipline specific mobile applications Offers an opportunity to meet the needs of contemporary learners and foster their competencies as lifelong learners Addresses emerging issues in technology and pedagogy

## **The Making and Breaking of Minds: How social interactions shape the human mind**

Isabella Sarto-Jackson, 2022-04-05 The human brain has a truly remarkable capacity It reorganizes itself flexibly adjusting to fluctuating environmental conditions a process called neuroplasticity Neuroplasticity provides the basis for wide ranging learning and memory processes that are particularly profuse during childhood and adolescence At the same time the exceptional malleability of the developing brain leaves it highly vulnerable to negative impact from the surroundings Abusive or neglecting social environments as well as socioeconomic deprivation and poverty cause toxic stress and complex traumas that can severely compromise cognitive development emotional processing self perception and executive brain functions The neurophysiological changes entailed impair emotional regulation lead to heightened anxiety and afflict attachment and the formation of social bonds Neuroplastic changes following severely adverse experiences are not something that a person grows out of and gets over These experiences alter the neurobiological and biochemical makeup and cause people to live in an emotionally relabeled world in which the evaluation of any social cue their behavior cognition and state of mind are biased towards the negative Even more worrying detrimental neurophysiological consequences are not limited to the traumatized individual but are often transmitted to subsequent generations through a process of social niche construction thereby creating a vicious cycle Thus the making and breaking forces of the brain are epitomized by parents alloparents peers and our socioeconomic niche This book expounds on the formative role that the social environment plays in healthy brain

development especially during infancy childhood and adolescence Based on scientific findings the book advocates for bold measures and responsible stewardship to combat child abuse maltreatment and child poverty By bringing together insights from neuroscience evolutionary biology and social education work it lays out a fact based transdisciplinary endeavor that aims at rising to the societal challenge of providing a rewarding perspective to youth at risk It will be a valuable resource for academics from social education pedagogy cognitive science neuroscience as well as professionals in the fields of social work pedagogy education child welfare

**The Environment and Science** Christian C. Young, 2005-04-25 A fascinating look at the historical relationship between environmental issues and scientific study social attitudes and public policy from the 17th century to the present The Environment and Science Social Impact and Interaction explores the history of how science investigates nature and how those studies both shape and are shaped by the social attitudes philosophies and politics of their times It follows the changes in perceptions of the natural world and humankind's place in it from the European colonization of North America through the Industrial Revolution and westward expansion to the rise of the consumer economy and the recent hardening of the ideological battle lines over environmental policy Coverage includes the emergence of ecology as a science and conservation as a movement the long history of conflicts between business interests and environmentalists and the role of scientific studies in debates over atomic and nuclear power pesticides toxic emissions and other human made sources of environmental degradation

Claimed by the Beast Saranna DeWylde, 2014-01-01 Dr Daphne Panetta is desperate to find a cure for a virus that turns its victims into zombie werewolves Infected Konstantin Gevaudan should be nothing more than a test subject but the only thing Daphne fears more than the beast within him is her own intense attraction to the virile man himself When the research facility where he's being held goes up in flames Konstantin has no choice but to take Daphne on the run with him For the desire burning between them can mean only one thing she is his true mate But how can he claim her without changing her forever

*From Naked Ape to Superspecies* David Suzuki, Holly Dressel, 2009-07-01 For millennia we lived in harmony with the Earth taking only what we required to survive But in just the past few centuries we have used our powers to satisfy our obsession with consumption and new technology without regard for the consequences And in doing so we have exploited our surroundings on an unprecedented scale In this revised and updated edition of *From Naked Ape to Superspecies* David Suzuki and Holly Dressel lucidly describe how we have evolved beyond our needs trampling other species believing that we can make the Earth work the way we want it to And they introduce us to the people who are fighting back those who are resisting the inexorable advance of the global economy juggernaut the people whose voices are difficult to hear over the din of corporate public relations machines We learn about how human arrogance demonstrated by our disregard for the small and microscopic species that constitute the Earth's engine and our reckless use of technological inventions like powerful herbicides or genetically engineered crops is threatening the health of our children and the safety of our food supply
