Journalism in the Age of Virtual Reality John V. Pavlik, 2019-09-17 With the advent of the internet and handheld or wearable media systems that plunge the user into 360o video augmented or virtual reality technology is changing how stories are told and created In this book John V Pavlik argues that a new form of mediated communication has emerged experiential news Experiential media delivers not just news stories but also news experiences in which the consumer engages news as a participant or virtual eyewitness in immersive multisensory and interactive narratives Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image He delves into developing forms such as virtual reality haptic technologies interactive documentaries and drone media presenting the principles of how to design and frame a story using these techniques Pavlik warns that although experiential news can heighten user engagement and increase understanding it may also fuel the transformation of fake news into artificial realities and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality Journalism in the Age of Virtual Reality offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public

Becoming the News Ruth Palmer, 2017-12-05 What does it feel like to be featured quoted or just named in a news story A refugee family the survivor of a shooting a primary voter in Iowa the views and experiences of ordinary people are an important component of journalism While much has been written about how journalists work and gather stories what do we discover about the practice of journalism and attitudes about the media by focusing on the experiences of the subjects themselves In *Becoming the News* Ruth Palmer argues that understanding the motivations and experiences of those who have been featured in news stories voluntarily or not sheds new light on the practice of journalism and the importance many continue to place on the role of the mainstream media Based on dozens of interviews with news subjects *Becoming the News* studies how ordinary people make sense of their experience as media subjects Palmer charts the arc of the experience of making the news from the events that brought an ordinary person to journalists attention through the decision to cooperate with reporters interactions with journalists and reactions to the news coverage and its aftermath She explores what motivates someone to talk to the press whether they consider the potential risks the power dynamics between a journalist and their subject their expectations about the motivations of journalists and the influence of social media on their decisions and reception Pointing to the ways traditional news organizations both continue to hold on to and are losing their authority *Becoming the News* has important implications for how we think about the production and consumption of news at a time when Americans distrust the news media more than ever

On Press Matthew Pressman, 2018-11-05 A study of how mainstream journalism transformed from 1960 to 1980 In the 1960s and

1970s the American press embraced a new way of reporting and selling the news. The causes were many: the proliferation of television, pressure to rectify the news media's dismal treatment of minorities and women, accusations of bias from left and right, and the migration of affluent subscribers to suburbs. As Matthew Pressman's timely history reveals, during these tumultuous decades the core values that held the profession together broke apart, and the distinctive characteristics of contemporary American journalism emerged. Simply reporting the facts was no longer enough. In a country facing assassinations, a failing war in Vietnam, and presidential impeachment, reporters recognized a pressing need to interpret and analyze events for their readers. Objectivity and impartiality, the cornerstones of journalistic principle, were not jettisoned but they were reimagined. Journalists' adoption of an adversarial relationship with government and big business, along with sympathy for the dispossessed, gave their reporting a distinctly liberal drift. Yet at the same time, soft news, lifestyle, arts, and entertainment moved to the forefront of editors' concerns as profits took precedence over politics. Today the American press stands once again at a precipice. Accusations of political bias are more rampant than ever, and there are increasing calls from activists, customers, advertisers, and reporters themselves to rethink the values that drive the industry. As *On Press* suggests, today's controversies are the latest iteration of debates that began a half century ago and will likely take the press in unforeseen directions and challenge its survival.

Praise for *On Press* The ultimate story behind all the stories. In tracing the evolution of news over the past half century, Matthew Pressman has produced an account that's deeply historical and not a little troubling. In an age when the press is alternately villain or hero, Pressman serves as a kind of medicine man of journalism, telling us how we got from there to here and warning us what must change. Graydon Carter, former editor of *Vanity Fair*. Pressman helps us understand how we came to our current troubled media moment with his deeply researched, engagingly written history of America's press in the 1960s and 70s. This is an important and original contribution and a needed one. Margaret Sullivan, media columnist for the *Washington Post*.

How Media Ownership Matters Rodney Benson, Mattias Hesselius, Timothy Neff, Julie Sedel, 2025-02-19. *How Media Ownership Matters* provides a roadmap to understanding how variable forms of ownership are shaping the future of journalism and democracy. Through a comparative analysis of the US, Sweden, and France, this book maps and analyzes four ownership models: market, private, civil society, and public. Highlighting the effects of organizational logics, funding, and target audiences on the content of news, the authors identify both the strengths and weaknesses various forms of ownership have in facilitating journalism that meets the democratic ideals of reasoned, critical, and inclusive public debate.

Networked News, Racial Divides Sue Robinson, 2018. Tracks power, privilege, and processes of community trust building in digitized media ecologies, focusing on public dialogues about racial inequality.

Media Today Joseph Turow, 2016-10-04. *Media Today* uses convergence as a lens that puts students at the center of the profound changes in the 21st-century media world. Through the convergence lens, they learn to think critically about the role of media today and what these changes mean for their lives presently and in the future. The book's media systems approach helps students to

look carefully at how media content is created distributed and exhibited in the new world that the digital revolution has created From newspapers to video games and social networking to mobile platforms Media Today prepares students to live in the digital world of media
