

*The Making of the Fittest:  
Evolving Switches, Evolving Bodies*

BioInteractive.org

BASIC WORKSHEET  
STUDENT HANDOUT

TUTORIAL 1

- Describe the following structures:
  - Complete pelvis: A fully developed pelvic girdle complete with both pelvic spines present.
  - Reduced pelvis: A partially to extremely underdeveloped pelvic girdle, with pelvic spines unrepresented.
  - Absent pelvis: No pelvic girdle nor pelvic spine is present.
- Start Tutorial 1. Continue to practice scoring fish until you have mastered the technique; then proceed to Experiment 1.

EXPERIMENT 1

- Explain in your own words the overall objective of Experiment 1.  
The overall objective of Experiment 1 is to compare the pelvic structures of two stickleback fish populations within lakes around Cook Inlet, Alaska, moreover using our data to develop conclusions about if there are any environmental factors that may possibly affect the evolution of pelvic form and structure.
- Click on the link to the map of Alaska, then click on the blue pin "A" on the larger map.  
What lake is located between Bear Paw Lake and Frog Lake just to the north?  
The lake that is located between Bear Paw Lake and Frog Lake just to the north is Prator Lake.
- In a population, what happens to organisms that are better adapted to the environment in which they live? Prator Lake.  
In a population, organisms that are better adapted to the environment in which they live are able to have a longer lifespan and produce more offspring.
- In the virtual lab window, complete Part 1: Staining the Fish.
  - Why do you think it is important to empty the used stain, destaining solution, and water under a fume hood? I think it is important to empty the used stain, destaining solution, and water under a fume hood so that it could prevent any unintentional mixtures to be made (i.e. mixture of the used stain and the destaining solution).
  - How were the fish you will be using in this virtual lab caught?  
The fish I will be using in this virtual lab were caught using cylindrical traps with funnel-shaped ends. They were thrown into freshwater lakes and left stationary overnight. During this time period, the fish would swim into the trap and get caught.
- In the virtual lab window, proceed to Part 2: Scoring the Fish. Later be pulled up in the day.
- Before scoring the fish, watch the short video on Bear Paw and Frog Lakes.  
According to Dr. Bell, what is an important difference between Bear Paw Lake and Frog Lake?  
According to Dr. Bell, an important difference between Bear Paw Lake and Frog Lake is that predation in Frog Lake is much higher than in Bear Paw Lake due to Frog Lake being connected to the river system via a small stream.
- In the window on the right, click on the link to read more about random sampling. Why are random samples, rather than entire populations, used in most research studies?  
Random samples, rather than entire populations, are used in most research studies as most populations in nature are too large to measure. On the other hand, Bear Paw lake is enclosed with waters that drain below the earth's surface and do not overflow.
- What is one advantage of studying larger-sized samples?  
One advantage of studying larger-sized samples is that it reduces the chance of sampling error.
- Give an example of sampling bias.  
An example of sampling bias is luring in only one specific species of stickleback fish given their choice of prey. Other types of species of stickleback may be unknown if you were to choose this route.

## **Making Of The Fittest Worksheet:**

**Toward a New Money Reality and a Quantum Economy** Laurie Z. Hyland, MBA, 2013-03-28 Toward a New Money Reality and a Quantum Economy takes us on a journey into the realm of money economics physics and the spirit It is an unusual journey for who would think that physics has any relationship whatsoever to money and economics And stranger yet why would our spiritual beings interact with money economics and physics In Toward a New Money Reality and a Quantum Economy economic futurist Laurie Z Hyland MBA draws us into discovering how these seemingly disparate topics are fascinatingly interconnected Hyland s twenty five years as a certified financial planner and a licensed investment advisor ignited her interest in people s relationship to money In the early 2000s she developed the concept for the New Money Reality seminar which was subsequently taught in Colorado Wisconsin New York and California Faced on a daily basis with explaining the whys and wherefores of the economy to her clients Hyland was led to explore the relationship of capitalism to Newton s ideas of a systematic universe and then contrast those ideas with a potential view of capitalism if seen through the lens of quantum physics Toward a New Money Reality and a Quantum Economy shows us how our current beliefs have evolved over the centuries and points to an empowering emerging worldview imagining money as a unifying exchange and capitalism as a system that works for everyone

**You Be Judge** Barbara Juskow, 2005 You Be the Judge helps students master essential skills for decision making and evaluation Complete lessons and reproducible worksheets introduce your students to three types of decision making criteria evaluations value judgements and judicial decisions Grades 5 8
