Management Control Systems and Tools for Internationalization Success Teixeira, Nuno Miguel, Ribeiro, Joaquim Silva, Teixeira, Ana Bela, Godinho, Teresa, 2019-11-22 In the competitive environment of corporate business, companies are constantly looking for a competitive edge. With the development of information and communication technologies, professionals are altering their process of conducting business. A vital tool that is contributing to this competitive shift is the management control system, which provides updated information on markets, contributing to smarter decisions. Management Control Systems and Tools for Internationalization Success is an essential reference source that discusses the fundamentals, benefits and risks of implementing internationalization strategies within a business, along with other organizational performance instruments. Featuring research on topics such as financial performance, international markets and evaluation systems, this book is ideally designed for entrepreneurs, managers, executives, IT consultants, business professionals, marketers, researchers, students and academicians seeking coverage on internationalization strategies within management control systems.

Management Control Systems, Decision-Making, and Innovation Development Dawid Szutowski, 2021-10-03 The systematic approach to innovation development today is one of the world's most prominent scientific fields and with good reason. When applied correctly, such a system produces regular outcomes which consistently drive lasting competitive advantage. Unfortunately, as much as it is beneficial, the orchestration of an undisturbed flow of multiple complex, dynamic and flexible innovation development processes is structurally demanding. In this book, a recognised innovation management specialist sets the record straight, offering a comprehensive approach to the improvement of innovation efficiency with the use of management control systems. Unlike other books on the subject, it proposes original representation of the CDI model of the relationships between management control system, decision making, quality and innovation system efficiency and explains why management control is fundamental to innovation management. In addition to that, inside the reader will find several original developments. These include the Info Deficiency ID model depicting the various parameters hindering decision

making in innovation development the product innovation development PID system offering the original function based approach to innovation management and the composite innovation index specially designed tool intended to evaluate the efficiency of an innovation development system It will be of interest to researchers academics practitioners and advanced students in the fields of management strategy and innovation Chapter 4 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>
