The Spatiotemporal Eschatology of Hebrews Luke Woo, 2024-07-11 There are two coexisting realities classified under New Testament eschatology the temporal and spatial While much scholarly attention has focused on the temporal Luke Woo argues that the spatial aspect is either neglected or relegated to Platonic or cosmological categories Woo thus seeks to provide a holistic understanding by investigating these realities for believers under the heavenly tabernacle motif in the Epistle to the Hebrews Woo posits that the author of Hebrews presents the heavenly tabernacle and all its high priestly activity in order to eschatologically situate orient and ground believers thus enabling believers to actualize their heavenly priestly identity by serving as priests on earth Woo uses Edward Soja's Tripartite Critical Spatiality to analyze the heavenly tabernacle's Firstspace Secondspace and Thirdspace features found in Hebrews 4:14 8:1 5:9 1:14 He suggests that Christ in his resurrection and ascension enters an actualized heavenly tabernacle which allows believers to spiritually occupy that sanctuary space in the presence of God establishing a spatial orientation for believers who can identify as heavenly priests and be motivated to serve as such as they live on earth

Thinking Geographically Brendan Bartley, Phil Hubbard, Rob Kitchin, 2004-10-01 *Thinking Geographically* offers students and faculty alike an elegant concise and thorough overview of contemporary theoretical concerns in geography Easily accessible to those unfamiliar with social theory this volume pushes the envelope of understanding by sketching the contours of post structuralist spatial thought including such critical emerging topics as geographies of text the body money and globalisation Brief biographies of influential theorists demonstrate how ideas are embodied and personified This volume is highly useful for courses in human geography the

history and status of the discipline and will stand as a milestone in the discipline's conceptual understanding over the next decade or more Barney Warf Florida State University The last decade has seen Geography transformed by an astonishing range of cultural and philosophical concepts and approaches Thinking Geographically is designed for students as an accessible and enjoyable introduction to this new landscape of geographical ideas The book takes the reader through the history of geographic thought up to a survey of the present Contemporary theory is then used to explore real world issues drawn from across the discipline of social cultural political and economic geography Entertainingly written and packed with examples and with profiles of key theorists the book is an ideal introduction for any student who wants to discover the potential of thinking geographically

Handbook of Contemporary Sociological Theory Seth Abrutyn, 2016-06-22 This Handbook provides the hidden common threads that tie sociological inquiry together and featuring eminent scholars it separates itself from its predecessors in substance and organization Rather than rehashing old debates or longingly gazing at the past this book presents sociologists with new ways of conceptualizing the organization and presentation of sociological theory At the heart of this Handbook's vision is the twin goals of making theory a viable enterprise by reconceptualizing how we teach theory and keeping theory closely tied to its empirical applications Three strategies are offered 1 Elucidating how classic issues like integration or interaction are interrogated today 2 Presenting a coherent vision of the social levels of reality that theorists work on such as communities groups and the self as well as how the coherence of these levels speaks to the macro micro link and 3 Theorizing the social world rather than celebrating theorists or theories that is one can look at how theory is used holistically to understand the constraints the social world places on our lived experience or the dynamics of social change Hence in the second decade of the 21st century it has become clear that sociology is at a crossroads as the number of theorists and amount of theory available is increasingly unmanageable and unknowable by the vast majority of professionals and students As such this Handbook of Contemporary Sociological Theory presents the novice and the expert with the a roadmap for traversing this crossroad and building a more coherent robust and cumulative sociology

Controlling Contested Places Christine Shepardson, 2019-05-14 From constructing new buildings to describing rival controlled areas as morally and physically dangerous leaders in late antiquity fundamentally shaped their physical environment and thus the events that unfolded within it Controlling Contested Places maps the city of Antioch Antakya Turkey through the topographically sensitive vocabulary of cultural geography demonstrating the critical role played by physical and rhetorical spatial contests during the tumultuous fourth century Paying close attention to the manipulation of physical places Christine Shepardson exposes some of the powerful forces that structured the development of religious orthodoxy and orthopraxy in the late Roman Empire Theological claims and political support were not the only significant factors in determining which Christian communities gained authority around the Empire Rather Antioch's urban and rural places far from being an inert backdrop against which events transpired were ever shifting sites of and tools for the

negotiation of power authority and religious identity This book traces the ways in which leaders like John Chrysostom Theodoret and Libanius encouraged their audiences to modify their daily behaviors and transform their interpretation of the world and landscape around them Shepardson argues that examples from Antioch were echoed around the Mediterranean world and similar types of physical and rhetorical manipulations continue to shape the politics of identity and perceptions of religious orthodoxy to this day *Bishops in Flight* Jennifer Barry, 2019-04-23 A free open access ebook is upon publication Learn more at www.luminosoa.org Flight during times of persecution has a long and fraught history in early Christianity In the third century bishops who fled were considered cowards or worse yet heretics On the face flight meant denial of Christ and thus betrayal of faith and community But by the fourth century the terms of persecution changed as Christianity became the favored cult of the Roman Empire Prominent Christians who fled and survived became founders and influencers of Christianity over time *Bishops in Flight* examines the various ways these episcopal leaders both appealed to and altered the discourse of Christian flight to defend their status as purveyors of Christian truth even when their exiles appeared to condemn them Their stories illuminate how profoundly Christian authors deployed theological discourse and the rhetoric of heresy to respond to the phenomenal political instability of the fourth and fifth centuries **Mystery, Murder and the**

Moorland. Devon-Spaces in British Detective Fiction of the 20th and 21st Century Cristina da Silva

Ferreira, 2014-03-13 Examination Thesis from the year 2014 in the subject English Language and Literature Studies Literature grade 1.0 University of Paderborn language English abstract This thesis will start with some general assumptions on spatiality in literature and outline its importance for detective fiction The focus will be on the concepts of space and place by de Certeau Lefebvre and Lotman Afterwards in the subchapter on the geographical and physical context crucial dichotomies of space which have an influence on detective novels will be examined especially the distinction between open and enclosed spaces The chapter that follows will deal with three concrete novels of different eras to explore the representation of Devon with regard to the specific dichotomy mentioned above Arthur Conan Doyle's *The Hound of the Baskervilles* 1902 and Agatha Christie's novel *The Sittaford Mystery* 1931 both depict Devon in the early and middle twentieth century while Simon Beckett's *The Calling of the Grave* 2010 shows a contemporary idea of how this region is perceived A comparative analysis of these three novels will follow in order to point out the similarities and differences of Devon spaces as well as to underline how they together create its overall image In this way this chapter shows that new inventions have only changed this location and its perception at the surface but not in its core Since there are many adaptations of Doyle's novel the fourth chapter will take a closer look at two medial representations of Devon and compare the literary with the medial space The popular film adaptation by Lanfield from 1939 and an episode of the BBC Series *Sherlock* a reimagining contemporary update of Doyle's classic will serve as examples Although many aspects of the adaptations could be compared to the novel the interest will primarily be in the cinematographic realisation of spaces

Furthermore the question of how far these spaces coincide with the image of Devon created by literature will be discussed. Subsequently the conclusion will finally summarise the findings of this thesis and suggest possibilities to expand the topic of British detective fiction and Devon spaces.

Environment & Planning ,2008-05 **The Library as Place** John E. Buschman, Gloria J. Leckie, 2007 Libraries as a component of cultural space are ubiquitous to almost every society during almost every time period. However as places of cultural and symbolic and intellectual meaning they have varied greatly. To capture both aspects this collection of 14 original papers covers library spaces old and new, real and imagined, large and small, public and private. Contributions range from a consideration of the Garrison library in the British Empire to the Carnegie library as a social institution to the imagined library in *Buffy the Vampire Slayer*. The result is a fascinating look at the library as a physical, social and intellectual place within the hearts and minds of its clientele and the public at large.

John Donne Journal ,2011 **Migration** Jim Pooler, Jiaosheng He, 2003 *The Politics of Place in Post-war Germany* David Clarke, Renate Rechten, 2009 A collection of essays by British and German scholars that focuses on the case of post war Germany, addressing a range of literary texts from East and West Germany as well as from the post unification period. It includes the essays that highlight the particular complexities and contradictions of the experience of place in the German case.

Environment and Planning ,2008 International interdisciplinary journal discussing the relations between Society and Space. Space is broadly conceived from landscapes of the body to global geographies from cyberspace to old growth forests as metaphorical and material as theoretical construct and empirical fact. Covers both practical politics and the abstractions of social theory.

The British National Bibliography Arthur James Wells, 2006 *Contemporary Youth Culture [2 Volumes]* Shirley R. Steinberg, Priya Parmar, Birgit Richard, 2006 This two volume set chronicles how technology, economics, the media and society created the modern concept of youth. Topics explored include hip hop culture, punk culture, social justice movements, video games, political activism, post feminism, television, race and ethnicity, visual art, sports, drugs and much more.

Xcp ,2007 **De arte** ,2006 **Spatial Practices** Markus Stock, Nicola Vöhringer, 2014 In recent decades the conceptualization of space and place as social constructs rather than static settings has received significant attention and has been re-evaluated with an emphasis on cultural, social and political practice. The study of spatial practices interrogates human action in a variety of spaces, human agency in the
