This book describes the century long emergence and battle to protect drivers and occupants of off road and on road vehicles from crush related injuries from rollovers Deaths and serious injuries have been associated with vehicle overturns that involve tractors other motorized machinery automobiles and small vehicles It took more than a century to attend to much of this epidemic of death and disabling injury that resulted from these overturns This book argues that a key factor in this response was epidemiology that reported rollover related deaths and engineering revisionism that moved responses from blame the victim to rollbars to prevent the deaths **Comprehensive Rock Engineering: Analysis and design methods** John A.
