*Related Party Transactions and Corporate Groups* Ivan Romashchenko, 2020-03-06 In a market environment where economic actors conduct themselves as diligent and conscientious managers the regulation of related party transactions RPTs would be largely irrelevant Unfortunately the corporate reality is far from an ideal world that is innocent of market abuse and corporate fraud It remains necessary to protect minority shareholders from the wrongdoings of majority shareholders and to protect all shareholders from opportunistic managerial behaviour This timely book the first on the subject since implementation of the European Union s EU s revised Shareholders Rights Directive provides in depth analysis of how and to what extent RPTs are covered by existing legal requirements on capital protection and corporate group regulation highlighting experiences and strategies adopted in Germany Poland and the Netherlands as examples for Eastern European countries and in particular Ukraine Beyond his comparative analysis of the current status the author offers recommendations for more effective handling of RPTs investigating such aspects as the following what constitutes a corporate group and how group issues are regulated in the various legal systems what constitutes a conflict of interest originating in ownership and control and what types of such conflicts occur whether RPTs within corporate groups should receive special treatment relative to transactions outside groups combatting corporate raiding most often carried out through illegal seizure of corporate assets approval and disclosure requirements for RPTs and how information about RPTs is disclosed publicly Drawing on resources including legislation case law scholarship and intensive discussions with practicing lawyers from several jurisdictions the author underscores the imperative of establishing limitations and requirements that oblige a company s officers shareholders and other potential related parties to follow certain rules whenever they wish to enter into an RPT As a contribution to the debate about the convergence between EU corporate law and that of major eastern European states the book has no peers

**Origins of 21st-century Space Travel** Glen R. Asner, Stephen J. Garber, 2019 As early as April 1999 NASA Administrator Dan Goldin established the Decadal Planning Team DPT to provide a forum for future Agency leaders to begin considering goals more ambitious than sending humans on missions to near Earth destinations and robotic spacecraft to far off destinations with no relation between the two Goldin charged DPT with devising a long term strategy that would integrate

the entire range of the Agency's capabilities in science and engineering robotic and human spaceflight to reach destinations beyond low Earth orbit When the Bush administration initiated interagency discussions in 2003 to consider a new spaceflight strategy NASA was prepared with technical and policy options as well as a team of individuals who had spent years preparing for the moment Although elements of the policy that President Bush announced at NASA Headquarters in January 2004 the Vision for Space Exploration VSE differed from the plans developed by DPT and its successor the NASA Exploration Team NeXT the benefits of preparation were unmistakable From the moment President Bush announced the VSE NASA stood ready to implement it Key decisions such as setting a termination date for Shuttle flights and initiating development of technologies for deep space exploration heralded a paradigm shift allowing both NASA and the U S space community to move beyond the infrastructure technologies and institutional arrangements that had sustained low Earth orbit operations for more than two decades This book provides a detailed historical account of the plans debates and decisions that opened the way for a new generation of spaceflight at the start of the 21st Century
