June 2013 Fp1 Past Paper:

Algal Technologies for Wastewater Treatment and Resource Recovery Raul Muñoz, Hardy Temmink, Anthony M. Verschoor, Peter van der Steen, 2019-07-26 Over 80% of globally produced wastewater receives little or no treatment before it is disposed into the environment. Therefore, it is urgent to develop new wastewater treatment technologies that are sustainable in the broad sense of the word, i.e. not only produce high quality effluents but also minimise energy expenses, recover energy and nutrients, and apply technology that is appropriate in relation to the availability of skilled personnel. This book compiles the main outcomes of recent efforts to improve the design of waste stabilisation ponds and confirms the superior performance of high rate algal ponds as a result of process intensification. Anaerobic digestion devoted to biogas production continues to be the preferred strategy for the energy valorisation of the algal biomass co-digestion with multiple high C/N ratio substrates, gathering significant attention over the past years. The potential of algal biomass as a biosorbent for heavy metal removal (Cu, Ni, F) maintains its share in the research field of water bioremediation, while research on nutrient removal has focused on providing new insights on the mechanism of nitrogen and phosphorus removal from wastewater in algal-bacterial systems. Finally, it is worth noticing that breakthroughs in complementary fields of research, such as nanotechnology or lighting technology, are gradually being implemented in algal biotechnology with new products such as nanoparticles for water disinfection or photobioreactors illuminated by low intensity LED panels. In Focus, a book series that showcases the latest accomplishments in water research. Each book focuses on a specialist area with papers from top experts in the field. It aims to be a vehicle for in-depth understanding and inspire further conversations in the sector. **Neural Oscillations in Physiology and Neuropsychiatric Disorders** Shozo Tobimatsu, Atsushi Nambu, 2022-10-11 *The Director and The Manager* David S. Fushtey, 2019-02-01 Machiavelli Had it Easy is an engaging text for the emerging discipline of governance. Gaps arise when directors and managers come together from diverse vocational and cultural languages and interests. Compressed information streams in the digital age yet few reconcile silos of business, legal expertise and regulatory public interests for informed decisions. This text presents research and a market-tested decision framework for comparative law, market practice and human nature in the vital strategic oversight role of governance. Informed by cognitive science, business practice and legal duties, one conclusion is that bias and self-interests are instinctive but reconciling best interests is not. Too often lessons learned from centuries of law are overlooked. The chapters are a dozen inquiries into recurring problems in the boardroom. Part one is an entry-level technical reference of law and governance principles. Unique appendices of keywords and case notes will aid those new to markets governed by the western rule of law and those tripping on gaps in comparative jargon. Part two is a series of practical hot topics in the context of law and governance. Part three looks to next steps in accountability and liability. The text will help accountants, engineers, lawyers and business operations and market policy experts from around the world work together and professors, professionals and

students anticipate change After drilling through accountability and liability for hybrid organizations typical crises are revealed to be from a lack of aligning interests and related information churn Conclusions of the how and why of governance systems link the human condition and the rule of law in the digital age Trump, Trudeau, Tweets, Truth Bill Fox,2022-03-23 Media has long been considered a primary site for political discourse in Western liberal democracies but now with the advent of social media giant multinational digital platforms such as Google and online journalism the way we do politics talk politics and cover politics has completely transformed Trump Trudeau Tweets Truth considers the ways that technology has led to an irreversible transition in power distribution political journalism and public discourse Discussing how the military industrial complex of the 1950s gave way to today s celebrity distribution complex Bill Fox examines the amount of power accorded to people well known for being well known from Donald Trump to Justin Trudeau Taking on a Canadian perspective Fox addresses the disturbing cries of fake news in the post truth age and demonstrates how journalism no longer the domain of a select few political reporters and editors has become decentralized and disaggregated In a world that now plays out on mobile devices Trump Trudeau Tweets Truth seeks a path through the debris left behind by recent seismic shifts in political media and technology Uneasy Partnership Geoffrey Hale,2018-01-25 In this new edition of Uneasy Partnership Geoffrey Hale examines the interdependent relationship between Canadian governments and businesses considering governments multiple roles in the economy and their implications for the business environment Hale provides an overview of the historical dimensions of Canada s political economy and relations between government and business Readers are invited to consider topics such as corporate power the implications of Canada s economic structure regional economic differences the cross cutting effects of globalization and the role of interest groups in political and policy processes In a thoughtful and well researched style Hale lays out how the partnership between business and government in Canada is an uneasy one and one whose capacity to adapt to ongoing change is essential in an uncertain world *Women in Management Worldwide* Ronald J. Burke,Astrid M. Richardsen,2016-08-12 Organizations today are facing unprecedented challenges including an ageing workforce potential talent shortages an increasingly competitive international environment and the need to utilize the talents of the best qualified people regardless of gender More women than men in many cases are graduating from universities and gaining the requisite experience to qualify for advancement to higher levels of management In this expanded and revised third edition Professors Burke and Richardsen together with a list of international contributors address women s progression in the workforce and into the upper echelons of management They cover a range of professions and a geographically dispersed territory thereby advancing the understanding of women in management within a traditional context and making a substantial contribution to the literature for both an academic and practitioner audience The broader regional perspective offers a comprehensive overview of the challenges and opportunities facing women in the workplace and promotes the ongoing analysis of the interface between women s career aspirations and societal and organizational

norms assumptions and values Following the same format as the previous edition the country by country analysis allows for the data between countries and regions to be compared for the differences to be addressed and a more holistic picture of the situation in a given country to be assessed Women in Management Worldwide will appeal to researchers policy makers in a range of countries interested in workforce issues talent management and gender equality as well as consultants working with international organizations on HRM and organizational effectiveness challenges

Managing Federalism through Pandemic Kathy L. Brock, Geoffrey Hale, 2023-11-07 Managing Federalism through Pandemic summarizes and analyses multiple policy dimensions of Canada's response to the COVID 19 pandemic and related policy issues from the perspective of Canadian federalism Contributors address the relative effectiveness of intergovernmental cooperation at the summit level and in policy fields including emergency management public health national security Indigenous Peoples and governments border governance crisis communications fiscal federalism income security policies CERB supply chain resilience and interacting energy and climate policies Despite serious policy failures of individual governments repeated fluctuations in the overall effectiveness of pandemic management and growing public frustration across provinces and regions contributors show how processes for intergovernmental cooperation adapted reasonably well to the pandemic's unprecedented stresses particularly at the outset The book concludes that despite individual policy failures Canada's decentralized approach to policy management often enabled regional adaptation to varied conditions helped to contain serious policy failures and contributed to various degrees of policy learning across governments Managing Federalism through Pandemic reveals how the pandemic exposed structural policy weaknesses which transcend federalism but have significant implications for how governments work together or don't to promote the well being of citizens
