Modern Philosophical Revolution breaks new ground by demonstrating the continuity of European philosophy from Kant to Derrida. Much of the literature on European philosophy has emphasised the breaks that have occurred in the course of two centuries of thinking. But as David Walsh argues, such a reading overlooks the extent to which Kant, Hegel and Schelling were already engaged in the turn toward existence as the only viable mode of philosophising. Where many similar studies summarise individual thinkers, this book provides a framework for understanding the relationships between them. Walsh thus dispels much of the confusion that assails readers when they are only exposed to the bewildering range of positions taken by the philosophers he examines. His book serves as an indispensable guide to a philosophical tradition that continues to have resonance in the post modern world.

Heidegger's Shadow Chad

Engelland, 2017-03-16. Heidegger's Shadow is an important contribution to the understanding of Heidegger's ambivalent relation to transcendental philosophy. Its contention is that Heidegger recognizes the importance of transcendental philosophy as the necessary point of entry to his thought but he nonetheless comes to regard it as something that he must strive to overcome even though he knows such an attempt can never succeed. Engelland thoroughly engages with major texts such as Kant and the Problem of Metaphysics, Being and Time, and Contributions and traces the progression of Heidegger's readings of Kant and Husserl to show that Heidegger cannot abandon his own earlier breakthrough work in transcendental philosophy. This book will be of interest to those working on phenomenology, continental philosophy and transcendental philosophy.
